STATEMENT OF ADDITIONAL INFORMATION

November 10, 2026

Listed and traded on:
The Nasdaq Stock Market LLC

This Statement of Additional Information ("SAI") is not a prospectus and should be read in conjunction with the prospectus of the CWP Premium Growth ETF and CWP Premium Dividend ETF (each a "Fund" and together the "Funds") dated November 10, 2026 (the "Prospectus"). The Prospectus is hereby incorporated by reference, which means it is legally part of this document. You can obtain copies of the Funds' Prospectus, financial statements, and annual and semi-annual reports of the Funds, when available, without charge by contacting the Funds' administrator, Ultimus Fund Solutions LLC, P.O. Box 46707 Cincinnati, OH 45246-0707 or by calling 1-847-680-9255. Because the Funds have recently commenced operations, there are no financial statements available at this time. Shareholders of the Funds will be informed of the Funds' progress through periodic reports when those reports become available. Financial statements certified by the Funds' independent registered public accounting firm will be submitted to shareholders at least annually. You may also obtain the Prospectus and financial statements, and annual or semi-annual report (when available) by visiting www.cwpfunds.com.

THE FUNDS

Each of the CWP Premium Growth ETF (the "Premium Growth ETF") and CWP Premium Dividend ETF (the "Premium Dividend ETF") (each a "Fund" and collectively the "Funds") is a series of Two Roads Shared Trust, a Delaware statutory trust organized on June 8, 2012 (the "Trust"). The Trust is registered as an open-end management investment company currently consisting of twenty-one separate, active portfolios (including the Funds). The Trust is governed by its Board of Trustees (the "Board" or "Trustees"). The Funds may issue an unlimited number of shares of beneficial interest. All shares of the Funds have equal rights and privileges. Each share of a Fund is entitled to one vote on all matters as to which shares are entitled to vote with respect to such Fund. In addition, each share of a Fund is entitled to participate equally with other shares (i) in dividends and distributions declared by such Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of the Funds are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share.

Each Fund is a "non-diversified" series of the Trust.

Each Fund's investment objective, restrictions and policies are more fully described herein and in the Prospectus. The Board may establish other series and offer shares of a new fund under the Trust at any time.

Under the Trust's Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the Investment Company Act of 1940, as amended (the "1940 Act") and the rules and regulations promulgated thereunder. Vacancies may be filled by a majority of the remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

Each Fund will issue and redeem Shares at net asset value ("NAV") only in aggregations of 10,000 Shares (a "Creation Unit"). Each Fund will issue and redeem Creation Units principally in exchange for a deposit of a specified cash payment, plus a transaction fee. The Funds may also issue and redeem Creation Units in exchange for an in-kind deposit of a basket of designated securities (the "Deposit Securities"), together with the deposit of a specified cash payment (the "Cash Component"), plus a transaction fee. The Funds are expected to be listed on the Nasdaq Stock Market LLC (the "Exchange"). Each Fund's shares will trade on the Exchange at market prices that may be below, at, or above such Fund's NAV. In the event of the liquidation of a Fund, a share split, reverse split or the like, the Trust may revise the number of Shares in a Creation Unit.

Each Fund reserves the right to offer creations and redemptions of Shares for cash. In addition, Shares may be issued in advance of receipt of Deposit Securities subject to various conditions, including a requirement to maintain on deposit with the Trust cash equal to up to 115% of the market value of the missing Deposit Securities. In each instance of such cash creations or redemptions, transaction fees, may be imposed and may be higher than the transaction fees associated with in-kind creations or redemptions. See **PURCHASE, REDEMPTION AND PRICING OF SHARES** below.

Exchange Listing and Trading

In order to provide additional information regarding the indicative value of Shares of a Fund, the Exchange or a market data vendor may disseminate every 15 seconds through the facilities of the Consolidated Tape Association or other widely disseminated means an updated "intraday indicative value" ("IIV") for that Fund as calculated by an information provider or market data vendor. The Trust is not involved in or responsible for any aspect of the calculation or dissemination of the IIV and makes no representation or warranty as to the accuracy of the IIV.

TYPES OF INVESTMENTS, STRATEGIES AND RELATED RISKS

The investment objective of each Fund and the description of its principal investment strategies are set forth under "Additional Information About Investment Objectives, Principal Investment Strategies and Related Risks" in the Prospectus. Each Fund's investment objective is not a fundamental policy and may be changed without the approval of a majority of the outstanding voting securities of such Fund (as such term is defined in the 1940 Act).

Each Fund is an actively-managed exchange-traded fund ("ETF") and does not seek to replicate the performance of a specified index.

In accordance with Rule 35d-1 under the 1940 Act, the Premium Growth ETF has adopted a non-fundamental investment policy that it will, under normal circumstances, invest at least 80% of its assets (plus the amount of borrowings for investment purposes) in growth-oriented U.S. equity index ETFs ("Underlying Funds") that focus on U.S. large- and mega-capitalization companies. The Fund will opportunistically utilize an "option strategy" consisting of writing U.S. exchange-traded covered call option contracts on the Underlying Funds held in its portfolio. The Fund is not managed relative to an index and has broad flexibility to allocate its assets across different sectors of the U.S. large cap equity markets. The 80% investment policy of the Fund may be changed at any time by the Board of Trustees. Shareholders will be given written notice at least 60 days prior to any change by the Fund of its 80% investment policy.

The Premium Dividend ETF has adopted a non-fundamental investment policy that it will, under normal circumstances, invest at least 80% of its assets (plus the amount of borrowings for investment purposes) in dividend paying U.S. equity index ETFs ("Underlying Funds") that focus on U.S. large- and mega-capitalization companies. The Fund will opportunistically utilize an "option strategy" consisting of writing U.S. exchange-traded covered call option contracts on the Underlying Funds held in its portfolio. The Fund is not managed relative to an index and has broad flexibility to allocate its assets across different sectors of the U.S. large cap equity markets. The 80% investment policy of the Fund may be changed at any time by the Board of Trustees. Shareholders will be given written notice at least 60 days prior to any change by the Fund of its 80% investment policy.

Each Fund is managed by Capital Wealth Planning, LLC ("CWP" or the "Adviser") and uses Vident Advisory, LLC (d/b/a Vident Asset Management) ("Vident" or the "Sub-Adviser") as its trading sub-adviser. The following pages contain more detailed information about the types of instruments in which each Fund may invest as a principal or non-principal investment strategy. These instruments include other strategies the Adviser may employ in pursuit of a Fund's investment objective and a summary of related risks. The Funds may be subject to the risks of the securities and other instruments described below through its own direct investments and indirectly through investments in Underlying Funds.

Securities of Other Investment Companies

Each Fund's investments in securities of other investment companies, including ETFs and mutual funds, ("underlying funds") involve certain additional expenses and certain tax results, which would not be present in a direct investment in the funds. Pursuant to Rule 12d1-4, each Fund and any "affiliated persons," as defined by the 1940 Act, must comply with certain conditions in order to: 1) purchase more than 3% of an investment company's (including ETFs) outstanding shares; 2) invest more than 5% of a Fund's assets in any single such investment company; 3) invest more than 10% of a Fund's assets in investment companies overall; and 4) invest in securities of a closed-end fund if, after such purchase, a Fund and any other investment companies with the same investment adviser would own more than 10% of the voting shares of such closed-end fund. Accordingly, when affiliated persons hold shares of any of the underlying funds, a Fund's ability to invest fully in shares of those funds is restricted, and the Adviser must then, in some instances, select alternative investments that would not have been its first preference, and 4) invest in securities issued by a closed-end fund if, after such purchase, the Fund and any other investment companies with the same investment adviser would own more than 10% of the voting shares of such closed-end fund. In addition, Section 12(d)(1)(f) allows an alternative method for unaffiliated funds to invest in underlying funds provided such investments are made in accordance with the requirements of Section 12(d)(1)(f). An underlying fund whose shares are purchased

by a Fund in reliance on Section 12(d)(1)(f) will not be obligated to redeem shares held by such Fund in an amount exceeding 1% of the underlying fund's outstanding securities during any period of less than 30 days. Shares held by a Fund in excess of 1% of an underlying fund's outstanding securities therefore, will be considered not readily marketable securities, which, together with other such securities, may not exceed 15% of a Fund's total assets.

Investment decisions by the investment advisers of the underlying funds are made independently of the Funds and its Adviser. Therefore, the investment adviser of one underlying fund may be purchasing shares of the same issuer whose shares are being sold by the adviser of a Fund. The result would be an indirect expense to the Fund without accomplishing any investment purpose.

Each investment company is subject to specific risks, depending on the nature of the Fund. ETFs and mutual funds may employ leverage, which magnifies the changes in the underlying stock or other index upon which they are based.

Open-End Investment Companies

Each Fund may invest in shares of open-end investment companies. Under certain circumstances an underlying fund may determine to make payment of a redemption by a Fund wholly or partly by a distribution in kind of securities from its portfolio, in lieu of cash, in conformity with the rules of the SEC. In such cases, the Fund may hold securities distributed by an underlying fund until the Adviser determines that it is appropriate to dispose of such securities.

Exchange-Traded Funds

ETFs are typically passively managed funds that track their related index and have the flexibility of trading like a security. They are managed by professionals and provide the investor with diversification, cost and tax efficiency, liquidity, marginability, are useful for hedging, have the ability to go long and short, and some provide quarterly dividends. Additionally, some ETFs are unit investment trusts (UITs) that have two markets. The primary market is where institutions swap "creation units" in block-multiples of 10,000 shares for in-kind securities and cash in the form of dividends. The secondary market is where individual investors can trade as little as a single share during trading hours on the exchange. This is different from open-ended mutual funds that are traded after hours once the NAV is calculated. ETFs share many similar risks with open-end and closed-end funds.

ETFs are shares issued by investment companies that are traded like traditional equity securities on a national stock exchange or the National Association of Securities Dealers Automated Quotations System ("NASDAQ") National Market System. An investment in an ETF generally presents the same primary risks as an investment in a conventional fund (i.e., one that is not exchange traded) that has the same investment objectives, strategies and policies. The price of an ETF can fluctuate within a wide range, and the Fund could lose money investing in an ETF if the prices of the securities owned by the ETF go down. In addition, ETFs are subject to the following risks that do not apply to conventional open-end mutual funds: (i) the market price of the ETF's shares may trade at a discount to their NAV; (ii) an active trading market for an ETF's shares may not develop or be maintained; or (iii) trading of an ETF's shares may be halted if the listing exchange's officials deem such action appropriate, the shares are de-listed from the exchange or the activation of market-wide "circuit breakers" (which are tied to large decreases in stock prices) halts stock trading generally.

ETF shares are not individually redeemable from the ETF, except upon termination of the ETF. To redeem from the ETF, an investor must accumulate enough ETF shares to reconstitute a creation unit. Upon redemption of a creation unit, an investor will receive securities underlying the ETF and cash identical to the portfolio deposit required of an investor wishing to purchase a creation unit that day. The Fund may sell ETF shares through a broker dealer.

The price of an ETF's shares is derived from and based upon the securities held by the ETF. Accordingly, the level of risk involved in the purchase or sale of an ETF is similar to the risk involved in the purchase or sale of traditional common stock, with the exception that the pricing mechanism for ETFs generally is based

on a basket of stocks. Disruptions in the markets for the securities underlying ETFs purchased or sold by the Fund could result in losses on ETFs.

Closed-End Investment Companies

The shares of closed-end funds are typically offered to the public in a one-time initial public offering by a group of underwriters who retain a spread or underwriting commission of between 4% or 6% of the initial public offering price. Such securities are then listed for trading on the New York Stock Exchange, the American Stock Exchange, the National Association of Securities Dealers Automated Quotation System (commonly known as "NASDAQ") and, in some cases, may be traded in other over-the-counter markets. Because the shares of closed-end funds cannot be redeemed upon demand to the issuer like the shares of an open-end investment company, investors seek to buy and sell shares of closed-end funds in the secondary market.

The Fund generally will purchase shares of closed-end funds only in the secondary market. The Fund will incur normal brokerage costs on such purchases similar to the expenses the Fund would incur for the purchase of securities of any other type of issuer in the secondary market. The Fund may, however, also purchase securities of a closed-end fund in an initial public offering when, in the opinion of the Adviser or Sub-Adviser, based on a consideration of the nature of the closed-end fund's proposed investments, the prevailing market conditions and the level of demand for such securities, they represent an attractive opportunity for growth of capital. The initial offering price typically will include a dealer spread, which may be higher than the applicable brokerage cost if the Fund purchased such securities in the secondary market.

The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share, which is less than the net asset value per share, the difference representing the "market discount" of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined net asset value but rather are subject to the principles of supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their net asset value.

The Fund may invest in shares of closed-end funds that are trading at a discount to net asset value or at a premium to net asset value. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the net asset value of the Fund's shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. The Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and net asset value than an investment in shares of investment companies without a leveraged capital structure.

Business Development Companies

Business development companies ("BDCs") are regulated under the 1940 Act and are taxed as regulated investment companies ("RICs") under the Internal Revenue Code of 1986, as amended (the "Code"). BDCs typically operate as publicly traded private equity firms that invest in early stage to mature private companies and small public companies. BDCs realize operating income when their investments are sold off, and therefore maintain complex organizational, operational, tax and compliance requirements, and must

distribute at least 90% of their taxable earnings as dividends. Additionally, a BDC's expenses are not direct expenses paid by Fund shareholders and are not used to calculate the Fund's net asset value.

Adviser Risks

If the Adviser to a Fund manages more money in the future, including money raised in this offering, such additional funds could affect its performance or trading strategies. Also, the Adviser manages other accounts. This increases the competition for the same trades which a Fund makes. There is no assurance that a Fund's trading will generate the same results as any other accounts managed by the Adviser.

Artificial Intelligence

Artificial intelligence ("AI") refers to computer systems that can perform tasks that would otherwise require human intelligence and encompasses various different forms of AI, including machine learning models. AI is typically designed to analyze data, learn from patterns and experiences, make decisions, and solve problems. AI can be categorized into two types: narrow AI, which is designed for specific tasks, and general AI, which has the ability to perform any intellectual task that a human can do and includes generative AI ("GAI"). GAI is a type of AI technology that produces new text, images, audio, and other content based on training data that includes examples of the desired output.

Typically, users enter questions, queries, or other inputs that prompt the GAI model or tool to produce output. In addition, some software uses GAI to suggest changes, summarize information, or translate text. AI has various applications in many fields such as healthcare, finance, transportation, and law.

The use of AI in general may adversely impact markets, the overall performance of a Fund's investments, or the services provided to a Fund by its service providers. The Adviser or a Sub-Adviser or a third party service provider may use and/or expand its use of AI in connection with its business, operating and investment activities and a Fund's investments may also use such technologies. Actual usage of such AI will vary, and while the Adviser or a Sub-Adviser expects that it and the third party service providers to a Fund may, from time to time, adopt and adjust usage policies and procedures governing the use of AI by its personnel, there is a risk of misuse of AI technologies.
AI is highly reliant on the collection and analysis of large amounts of data and complex algorithms, but it is not possible nor practicable to incorporate all data that would be relevant for a task conducted by AI. Therefore, it is possible that the information provided through use of AI could be insufficient, incomplete, inaccurate or biased leading to adverse effects for a Fund, including, potentially, operational errors and investment losses.

AI and its current and potential future applications, including in the investment and financial sectors, as well as the regulatory frameworks within which they operate, continue to rapidly evolve, and it is impossible to predict the full extent of future applications or regulations. Ongoing and future regulatory actions with respect to AI generally or AI's use in any industry in particular may alter, perhaps to a materially adverse extent, the ability of the Adviser or a Sub-Adviser, a third-party service provider, a Fund or its investments to utilize AI in the manner it has to-date, and may have an adverse impact on the ability of any of those entities to continue to operate as intended.

Borrowing

Each Fund may borrow money for investment purposes. Borrowing for investment purposes is one form of leverage. Leveraging investments, by purchasing securities with borrowed money, is a speculative technique that increases investment risk, but also increases investment opportunity. Because substantially all of the Fund's assets will fluctuate in value, whereas the interest obligations on borrowings may be fixed, the NAV per share of the Fund will increase more when the Funds' portfolio assets increase in value and decrease more when the Fund's portfolio assets decrease in value than would otherwise be the case. Moreover, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the returns on the borrowed funds. Under adverse conditions, the Fund may have to sell portfolio securities to meet interest or principal payments at a time when investment considerations would not favor such sales. The Funds may use leverage during periods when the Adviser believes that the Funds' investment objective would be furthered.

Each Fund may also borrow money to facilitate management of the Fund's portfolio by enabling the Fund to meet redemption requests when the liquidation of portfolio instruments would be inconvenient or disadvantageous. Such borrowing is not for investment purposes and will be repaid by the Fund promptly. As required by the 1940 Act, the Funds must maintain continuous asset coverage (total assets, including assets acquired with borrowed funds, less liabilities exclusive of borrowings) of 300% of all amounts borrowed. If, at any time, the value of the Fund's assets should fail to meet this 300% coverage test, the Fund, within three days (not including Sundays and holidays), will reduce the amount of the Fund's borrowings to the extent necessary to meet this 300% coverage requirement. Maintenance of this percentage limitation may result in the sale of portfolio securities at a time when investment considerations otherwise indicate that it would be disadvantageous to do so.

In addition to the foregoing, each Fund is authorized to borrow money as a temporary measure for extraordinary or emergency purposes in amounts not in excess of 5% of the value of the Fund's total assets. Borrowings for extraordinary or emergency purposes are not subject to the foregoing 300% asset coverage requirement.

Certificates of Deposit and Bankers' Acceptances

The Fund may invest in certificates of deposit and bankers' acceptances, which are considered to be short-term money market instruments.

Certificates of deposit are receipts issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the bearer of the receipt on the date specified on the certificate. The certificate usually can be traded in the secondary market prior to maturity. Bankers' acceptances typically arise from short-term credit arrangements designed to enable businesses to obtain funds to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an earning asset or it may be sold in the secondary market at the going rate of discount for a specific maturity. Although maturities for acceptances can be as long as 270 days, most acceptances have maturities of six months or less.

Cybersecurity Risk

A Fund and its service providers may be prone to operational and information security risks resulting from breaches in cybersecurity. A breach in cybersecurity refers to both intentional and unintentional events that may cause a Fund to lose proprietary information, suffer data corruption, or lose operational capacity. Breaches in cybersecurity include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyberattacks. Cybersecurity breaches affecting a Fund or the Adviser, Sub-Adviser, custodian, transfer agent, intermediaries and other third-party service providers may adversely impact such Fund. For instance, cybersecurity breaches may interfere with the processing of shareholders transactions, impact a Fund's ability to calculate its NAVs, cause the release of private shareholder information or confidential business information, impede trading, subject a Fund to regulatory fines or financial losses and/or cause reputational damage. A Fund may also incur additional costs for cybersecurity risk management purposes. Similar types of cybersecurity risks are also present for issuers of securities in which a Fund may invest, which could result in material adverse consequences for such issuers and may cause such Fund's investment in such companies to lose value. Operational risk may arise from human error, error by third parties, communication errors, or technology failures, among other causes. Because technology is frequently changing (including the development of AI and machine learning), new ways to carry out cyberattacks continue to develop. There is a chance that some risks have not been identified or prepared for, or that an attack may not be detected, which puts limitations on the Fund's ability to plan for or respond to a cyber attack. The rapid development and increasingly widespread use of AI technologies could increase the effectiveness of cyberattacks and exacerbate the risks.

Derivatives Instruments

Each Fund may purchase and write call and put options on securities and securities indices, and enter into futures contracts and use options on futures contracts as further described below. A Fund may use these techniques to hedge against changes in interest rates or securities prices or to attempt to achieve investment returns as part of its overall investment strategies.

Each Fund considers derivative instruments to consist of securities or other instruments whose value is derived, at least in part, from or related to the price or value of another instrument or asset or the level of an index, such as the S&P 500 Index, or indices, and not to include those securities whose payment of principal and/or interest depends upon cash flows from underlying assets, such as mortgage-related or asset-backed securities. The value of some derivative instruments in which a Fund invests may be particularly sensitive to changes in prevailing interest rates, and, like the other investments of a Fund, the ability of a Fund to successfully utilize these instruments may depend in part upon the ability of the adviser or sub-adviser to correctly forecast interest rates and other economic factors. If the adviser or sub-adviser incorrectly forecasts such factors and has taken positions in derivative instruments contrary to prevailing market trends, a Fund could be exposed to the risk of loss. In addition, while the use of derivatives for hedging purposes can reduce losses, it can also reduce or eliminate gains, and hedges are sometimes subject to imperfect matching between the derivative and security it is hedging, which means that a hedge might not be effective. A Fund might not employ any of the strategies described above, and no assurance can be given that any strategy used will succeed. A decision as to whether, when and how to utilize derivative instruments involves skill and judgment, and even a well-conceived derivatives strategy may be unsuccessful. The use of derivative instruments involves brokerage fees and/or other transaction costs.

Investment in futures-related and commodity-linked derivatives may subject a Fund to additional risks, and in particular may subject a Fund to greater volatility than investments in traditional securities. The value of futures-related and commodity-linked derivative instruments may be affected by changes in overall market movements, commodity index volatility, changes in interest rates or factors affecting a particular industry or commodity, such as drought, floods, weather, livestock disease, embargoes, tariffs, and international economic, political and regulatory developments. In order to qualify for the special tax treatment available to regulated investment companies under the Code, the Fund must, among other things, derive at least 90% of its gross income each taxable year from certain specified types of investments. It is currently unclear which types of commodities-linked derivatives fall within these specified investment types. As a result, if the Fund's investment in commodities-linked derivatives were to exceed a certain threshold, the Fund could fail to qualify for the special tax treatment available to regulated investment companies under the Internal Revenue Code.

Some forms of derivative instruments, such as exchange-traded futures and certain options, are traded on regulated exchanges. These types of derivative instruments are standardized contracts for which market quotations are published daily, Non-standardized derivative instruments, on the other hand, tend to be more specialized or complex, and may be harder to value. While derivative instruments may be useful for investment and hedging, they also carry additional risks. Derivatives have the effect of leverage on a Fund, meaning that a small investment in derivative instruments could have a potentially large impact on the Fund's returns. The use of derivative instruments involves risks different from, and/or possibly greater than, the risks associated with investing directly in the underlying assets or references. The use of derivative instruments is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary securities transactions. Each Fund may choose not to invest in derivative instruments because of their cost, limited availability or any number of other reasons deemed relevant by the Adviser.

Regulatory Risks of Derivative Use

Rule 18f-4 under the 1940 Act permits a Fund to enter into Derivatives Transactions (as defined below) and certain other transactions notwithstanding the restrictions on the issuance of "senior securities" under Section 18 of the 1940 Act. Section 18 of the 1940 Act, among other things, prohibits open-end funds, including the Fund, from issuing or selling any "senior security," other than borrowing from a bank (subject to a requirement to maintain 300% "asset coverage").

Under Rule 18f-4, "Derivatives Transactions" include the following: (1) any swap, security-based swap (including a contract for differences), futures contract, forward contract, option (excluding purchased options), any combination of the foregoing, or any similar instrument, under which the Fund is or may be required to make any payment or delivery of cash or other assets during the life of the instrument or at maturity or early termination, whether as margin or settlement payment or otherwise; (2) any short sale borrowing; (3) reverse repurchase agreements and similar financing transactions (e.g., recourse and non-recourse tender option bonds, and borrowed bonds), if the Fund elects to treat these transactions as Derivatives Transactions under Rule 18f-4; and (4) when-issued or forward-settling securities (e.g., firm and

standby commitments, including to-be-announced commitments, and dollar rolls) and non-standard settlement cycle securities, unless the Fund intends to physically settle the transaction and the transaction will settle within 35 days of its trade date (the "Delayed-Settlement Securities Provision").

The Funds do not intend to rely on the Limited Derivatives User Exception (as defined below). Accordingly, a Fund must comply with Rule 18f-4 with respect to its Derivatives Transaction. Rule 18f-4, among other things, requires a Fund to adopt and implement a comprehensive written derivatives risk management program ("DRMP") and comply with a relative or absolute limit on Fund leverage risk calculated based on value-at-risk ("VaR"). The DRMP is administered by a "derivatives risk manager," who is appointed by the Board, including a majority of Independent Directors/Trustees, and periodically reviews the DRMP and reports to the Board.

Rule 18f-4 provides an exception from the DRMP, VaR limit and certain other requirements if a Fund's "derivatives exposure" (as defined in Rule 18f-4) is limited to 10% of its net assets (as calculated in accordance with Rule 18f-4) and the Fund adopts and implements written policies and procedures reasonably designed to manage its derivatives risks (the "Limited Derivatives User Exception").

The Commodity Futures Trading Commission ("CFTC") rules require advisers to certain registered investment companies to register with the CFTC as a commodity pool operator ("CPO") if their investment companies are unable to meet certain trading and marketing limitations. The Funds' Adviser has claimed relief from registration as a CPO. However, it is possible that the Adviser may be required to register as a CPO in the future and comply with any applicable reporting, disclosure or other regulatory requirements. Compliance with CFTC regulatory requirements will increase Fund expenses. Other potentially adverse regulatory initiatives could also develop. It is also possible that additional government regulation of various types of derivative instruments, including futures, options and swap agreements, may limit or prevent the Fund from using such instruments as a part of its investment strategy, and could ultimately prevent the Fund from being able to achieve its investment objective.

It is impossible to fully predict the effects of past, present or future legislation and regulation in this area, but the effects could be substantial and adverse. It is possible that legislative and regulatory activity could limit or restrict the ability of the Fund to use certain instruments as a part of its investment strategy. Limits or restrictions applicable to the counterparties with which the Fund may engage in derivative transactions could also prevent the Fund from using certain instruments. There is a possibility of future regulatory changes altering, perhaps to a material extent, the nature of an investment in the Fund or the ability of the Fund to continue to implement its investment strategy. The futures, options and swaps markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the SEC, CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the implementation or reduction of speculative position limits, the implementation of higher margin requirements, the establishment of daily price limits and the suspension of trading. The regulation of futures, options and swaps transactions in the U.S. is a rapidly changing area of law and is subject to modification by government and judicial action.

In 2010, the U.S. government enacted legislation that provides for new regulation of the derivatives market, including clearing, margin, reporting and registration requirements. The CFTC and certain futures exchanges have also established limits, referred to as "position limits," on the maximum net long or net short positions which any person may hold or control in particular options and futures contracts. All positions owned or controlled by the same person or entity, even if in different accounts, may be aggregated for purposes of determining whether the applicable position limits have been exceeded. Thus, even if a Fund does not intend to exceed applicable position limits, it is possible that different clients managed by the Adviser and its affiliates may be aggregated for this purpose. The trading decisions of the Adviser or Sub-Adviser may have to be modified and positions held by a Fund may have to be liquidated in order to avoid exceeding such limits. The modification of investment decisions or the elimination of open positions, if it occurs, may adversely affect the profitability of the Fund.

The SEC has in the past adopted interim rules requiring reporting of all short positions on securities above a certain de minimis threshold and may adopt rules requiring monthly and/or enhanced public disclosure in the

future. In addition, other non-U.S. jurisdictions where a Fund may trade have adopted reporting requirements. If a Fund's securities short positions or its strategy become generally known, it could have a significant effect on the Adviser's or Sub-Adviser's ability to implement its investment strategy. In particular, it would make it more likely that other investors could cause a "short squeeze" in the securities held short by a Fund forcing the Fund to cover its positions at a loss. Such reporting requirements may also limit the Adviser's or Sub-Adviser's ability to access management and other personnel at certain companies where the Adviser or Sub-Adviser seeks to take a short position. In addition, if other investors engage in copycat behavior by taking positions in the same issuers as the Fund, the cost of borrowing securities to sell short could increase drastically and the availability of such securities to the Fund could decrease drastically. Such events could make the Fund unable to execute its investment strategy. In addition, the SEC recently proposed additional restrictions on short sales. If the SEC were to adopt additional restrictions regarding short sales, they could restrict the Fund's ability to engage in short sales of securities in certain circumstances, and the Fund may be unable to execute its investment strategy as a result.

The SEC and regulatory authorities in other jurisdictions may adopt (and in certain cases, have adopted) bans on short sales of certain securities in response to market events. Bans on short selling may make it impossible for the Fund to execute certain investment strategies and may have a material adverse effect on the Fund's ability to generate returns.

Margin Deposits for Futures Contracts

Unlike the purchase or sale of portfolio securities, no price is paid or received by a Fund upon the purchase or sale of a futures contract. Initially, the Fund will be required to deposit with the broker an amount of cash or cash equivalents, known as initial margin, based on the value of the contract. The nature of initial margin in futures transactions is different from that of margin in securities transactions in that futures contract margin does not involve the borrowing of funds by the customer to finance the transactions. Rather, the initial margin is in the nature of a performance bond or good faith deposit on the contract which is returned to the Fund upon termination of the futures contract, assuming all contractual obligations have been satisfied. Subsequent payments, called variation margin, to and from the broker, will be made on a daily basis as the price of the underlying instruments fluctuates, making the long and short positions in the futures contract more or less valuable, a process known as "marking to the market." For example, when the Fund has purchased a futures contract and the price of the contract has risen in response to a rise in the price of the underlying instruments, that position will have increased in value and the Fund will be entitled to receive from the broker a variation margin payment equal to that increase in value. Conversely, where the Fund has purchased a futures contract and the price of the futures contract has declined in response to a decrease in the underlying instruments, the position would be less valuable and the Fund would be required to make a variation margin payment to the broker. At any time prior to expiration of the futures contract, the Adviser may elect to close the position by taking an opposite position, subject to the availability of a secondary market, which will operate to terminate the Fund's position in the futures contract. A final determination of variation margin is then made, additional cash is required to be paid by or released to the Fund, and the Fund realizes a loss or gain.

Equity Securities

Equity securities include common stocks, preferred stocks and securities convertible into common stocks, such as convertible bonds, warrants, rights and options. The value of equity securities varies in response to many factors, including the activities and financial condition of individual companies, the business market in which individual companies compete and general market and economic conditions. Equity securities fluctuate in value, often based on factors unrelated to the value of the issuer of the securities, and such fluctuations can be significant.

Common Stock

Common stock represents an equity (ownership) interest in a company, and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's stock price.

Preferred Stock

Preferred stock is a class of stock that has features of debt because it generally entitles the holder to periodic payments at a fixed rate of return. Preferred stock has a preference over common stock as to the payment of dividends and the recovery of investment should a company be liquidated, although preferred stock is usually junior to any outstanding debt of the issuer. Preferred stock typically does not possess voting rights and its market value may change based on changes in interest rates.

The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income securities and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measures of a company's worth. Preferred stock may be subject to more fluctuations in market value, due to changes in market participants' perceptions of the issuer's ability to continue to pay dividends, than debts of the same issuer. A preferred stock may be considered either debt or equity, depending on the economic characteristics exhibited by such preferred stock.

Illiquid and Restricted Securities

Pursuant to Rule 22e-4 under the 1940 Act, each Fund may invest up to 15% of its net assets in illiquid investments. An illiquid investment is an investment that a Fund reasonably expects cannot be sold or disposed of in current market conditions within 7 calendar days or less without the sale or disposition significantly changing the market value of the investment. Illiquid investments include securities that are illiquid by virtue of the absence of a readily available market (*e.g.*, because trading in the security is suspended or because market makers do not exist or will not entertain bids or offers) or legal or contractual restrictions on resale (*e.g.*, because they have not been registered under the Securities Act). Illiquid investments include: repurchase agreements and time deposits with a notice or demand period of more than seven days; interest rate; currency, mortgage and credit default swaps; interest rate caps; floors and collars; municipal leases; certain restricted securities, such as those purchased in a private placement of securities, unless it is determined, based upon a review of the trading markets for a specific restricted security, that such restricted security is liquid; and certain over-the-counter options. Securities that have legal or contractual restrictions on resale but have a readily available market are not considered illiquid for purposes of this limitation. With respect to each Fund, repurchase agreements subject to demand are deemed to have a maturity equal to the notice period. Foreign (non-U.S.) securities that are freely tradable in their principal markets are not considered to be illiquid. To the extent an investment held by a Fund is deemed to be an illiquid investment or a less liquid investment, the Fund will be exposed to a greater liquidity risk.

Restricted and other illiquid investments may be subject to the potential for delays on resale and uncertainty in valuation. A Fund might be unable to dispose of illiquid investments promptly or at reasonable prices and might thereby experience difficulty in satisfying redemption requests. A Fund might have to register restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities. To the extent an investment held by a Fund is deemed to be an illiquid investment or a less liquid investment, the Fund will be exposed to a greater liquidity risk.

As required by Rule 22e-4, under the 1940 Act, the Trust has implemented a liquidity risk management program and related procedures to identify illiquid investments pursuant to Rule 22e-4. If the limitation on illiquid investments is exceeded, other than by a change in market values, the condition will be reported to the Board and, when required, to the SEC. The rule may impact the Fund's performance and ability to achieve its investment objective.

A large institutional market exists for certain securities that are not registered under the Securities Act, including foreign (non-U.S.) securities. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. Rule 144A under the Securities Act allows such a broader institutional trading market for securities otherwise subject to restrictions on resale to the general public. Rule 144A establishes a "safe harbor" from the registration requirements of the Securities Act for resale of

certain securities to qualified institutional buyers. Rule 144A has produced enhanced liquidity for many restricted securities, and market liquidity for such securities may continue to expand as a result of this regulation and the consequent existence of the PORTAL system, which is an automated system for the trading, clearance and settlement of unregistered securities of domestic and foreign (non-U.S.) issuers sponsored by the Financial Industry Regulatory Authority, Inc.

Rule 144A securities and Section 4(a)(2) commercial paper that have been deemed liquid as described above will continue to be monitored by the Adviser to determine if the security is no longer liquid as the result of changed conditions. Investing in Rule 144A securities or Section 4(a)(2) commercial paper could have the effect of increasing the amount of a Fund's assets invested in illiquid securities if institutional buyers are unwilling to purchase such securities.

Recent Market Events

A Fund could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. The value of a security or other instrument may decline due to changes in general market conditions, economic trends or events that are not specifically related to the issuer of the security or other instrument, or factors that affect a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates generally do not have the same impact on all types of securities and instruments.

Stresses associated with the 2008 financial crisis in the United States and global economies peaked over a decade ago, but periods of unusually high volatility in the financial markets and restrictive credit conditions, sometimes limited to a particular sector or a geography, continue to recur. Some countries, including the United States, have adopted and/or are considering the adoption of more protectionist trade policies, a move away from the tighter financial industry regulations that followed the financial crisis, and/or substantially reducing corporate taxes. The exact shape of these policies is still being considered, but the equity and debt markets may react strongly to expectations of change, which could increase volatility, especially if the market's expectations are not borne out. A rise in protectionist trade policies, and the possibility of changes to some international trade agreements, could affect the economies of many nations in ways that cannot necessarily be foreseen at the present time. In addition, geopolitical and other risks, including environmental and public health, may add to instability in world economies and markets generally. Economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not a Fund invests in securities of issuers located in or with significant exposure to countries experiencing economic, political and/or financial difficulties, the value and liquidity of the Fund's investments may be negatively affected by such events.

COVID-19 resulted in travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, business and school closings, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of infectious illness outbreaks (like COVID-19) that may arise in the future, could adversely affect the economies of many nations or the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. In addition, as a possible consequence of the measures taken in response to the spread of COVID-19 (and other illness outbreaks in the future) and the resulting market disruptions, volatility and liquidity concerns, the Fund may have difficulty in complying with the distribution requirements necessary for the Fund to maintain its status as a regulated investment company under the Internal Revenue Code.

Political turmoil within the U.S. and abroad may also impact a Fund. Although the U.S. government has honored its credit obligations, it remains possible that the U.S. could default on its obligations. While it is impossible to predict the consequences of such an unprecedented event, it is likely that a default by the U.S. would be highly disruptive to the U.S. and global securities markets and could significantly impair the value of a Fund's investments. Similarly, political events within the U.S. at times have resulted, and may in the future result, in a shutdown of government services, which could negatively affect the U.S. economy, decrease the value of the Funds' investments, and increase uncertainty in or impair the operation of the U.S. or other securities markets. In recent years, the U.S. renegotiated many of its global trade relationships and imposed or threatened to impose significant import tariffs. These actions could lead to price volatility and overall declines in U.S. and global investment markets. The current contentious

domestic political environment, as well as political and diplomatic events within the U.S. and abroad, such as presidential elections in the U.S. or abroad may adversely affect the U.S. regulatory landscape, the general market environment and/or investor sentiment, which could have an adverse impact on the Funds' investments and operations. The change in the U.S. presidential administration in 2025 has resulted in significant impacts to international trade relations, tax and immigration policies, and other aspects of the national and international political and financial landscape, which could affect, among other things, inflation and the securities markets generally.

Recent technological developments in, and the increasingly widespread use of AI, including machine learning technology and generative AI, may pose risks to a portfolio. For instance, the economy may be significantly impacted by the advanced development and increased regulation of AI. As AI is used more widely, the profitability and growth of portfolio holdings may be impacted, which could significantly impact the overall performance of the portfolio. The legal and regulatory frameworks within which AI operates continue to rapidly evolve, and it is not possible to predict the full extent of current or future risks related thereto.

Regulation as a Commodity Pool Operator

The Adviser, on behalf of the Funds, will file with the National Futures Association, a notice claiming an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act, as amended, and the rules of the CFTC promulgated thereunder, with respect to each Fund's operation. Accordingly, each Fund will not be subject to registration or regulation as a commodity pool operator.

Securities Options

Each Fund may purchase and write (i.e., sell) put and call options. Such options may relate to particular securities or stock indices, and may be listed on a U.S. securities exchange and issued by the Options Clearing Corporation. Options trading is a highly specialized activity that entails greater than ordinary investment risk. Options may be more volatile than the underlying instruments, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves.

A call option for a particular security gives the purchaser of the option the right to buy, and the writer (seller) the obligation to sell, the underlying security at the stated exercise price at any time prior to the expiration of the option, regardless of the market price of the security. The premium paid to the writer is in consideration for undertaking the obligation under the option contract. A put option for a particular security gives the purchaser the right to sell the security at the stated exercise price at any time prior to the expiration date of the option, regardless of the market price of the security.

Stock index options are put options and call options on various stock indices. In most respects, they are identical to listed options on common stocks. The primary difference between stock options and index options occurs when index options are exercised. In the case of stock options, the underlying security, common stock, is delivered. However, upon the exercise of an index option, settlement does not occur by delivery of the securities comprising the index. The option holder who exercises the index option receives an amount of cash if the closing level of the stock index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the difference between the closing price of the stock index and the exercise price of the option expressed in dollars times a specified multiple. A stock index fluctuates with changes in the market value of the stocks included in the index. For example, some stock index options are based on a broad market index, such as the Standard & Poor's 500® Index or the Value Line Composite Index or a narrower market index, such as the Standard & Poor's 100®. Indices may also be based on an industry or market segment, such as the NYSE ARCA Oil and Gas Index or the Computer and Business Equipment Index. Options on stock indices are currently traded on the Chicago Board Options Exchange, the New York Stock Exchange, the American Stock Exchange, the Pacific Stock Exchange, the Philadelphia Stock Exchange, and the NASDAQ PHLX.

A Fund's obligation to sell an instrument subject to a call option written by it, or to purchase an instrument subject to a put option written by it, may be terminated prior to the expiration date of the option by the Fund's execution of a closing purchase transaction, which is effected by purchasing on an exchange an option of the same series (i.e., same underlying instrument, exercise price and expiration date) as the option previously written. A closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying instrument

from being called, to permit the sale of the underlying instrument or to permit the writing of a new option containing different terms on such underlying instrument. The cost of such a liquidation purchase plus transactions costs may be greater than the premium received upon the original option, in which event the Fund will have incurred a loss in the transaction.

If an option purchased by a Fund expires unexercised, the Fund realizes a loss equal to the premium paid. If the Fund enters into a closing sale transaction on an option purchased by it, the Fund will realize a gain if the premium received by the Fund on the closing transaction is more than the premium paid to purchase the option, or a loss if it is less. If an option written by the Fund expires on the stipulated expiration date or if the Fund enters into a closing purchase transaction, it will realize a gain (or loss if the cost of a closing purchase transaction exceeds the net premium received when the option is sold). If an option written by the Fund is exercised, the proceeds of the sale will be increased by the net premium originally received and the Fund will realize a gain or loss.

Certain Risks Regarding Options

There are several risks associated with transactions in options. For example, there are significant differences between the securities and options markets that could result in an imperfect correlation between these markets, causing a given transaction not to achieve its objectives. In addition, a liquid secondary market for particular options, whether traded over-the-counter or on an exchange, may be absent for reasons which include the following: there may be insufficient trading interest in certain options; restrictions may be imposed by an exchange on opening transactions or closing transactions or both; trading halts, suspensions or other restrictions may be imposed with respect to particular classes or series of options or underlying securities or currencies; unusual or unforeseen circumstances may interrupt normal operations on an exchange; the facilities of an exchange or the Options Clearing Corporation may not at all times be adequate to handle current trading value; or one or more exchanges could, for economic or other reasons, decide or be compelled at some future date to discontinue the trading of options (or a particular class or series of options), in which event the secondary market on that exchange (or in that class or series of options) would cease to exist, although outstanding options that had been issued by the Options Clearing Corporation as a result of trades on that exchange would continue to be exercisable in accordance with their terms.

Successful use by a Fund of options on stock indices will be subject to the ability of the Adviser to correctly predict movements in the directions of the stock market. This requires different skills and techniques than predicting changes in the prices of individual securities. In addition, a Fund's ability to effectively hedge all or a portion of the securities in its portfolio, in anticipation of or during a market decline, through transactions in put options on stock indices, depends on the degree to which price movements in the underlying index correlate with the price movements of the securities held by the Fund. Inasmuch as a Fund's securities will not duplicate the components of an index, the correlation will not be perfect. Consequently, a Fund bears the risk that the prices of its securities being hedged will not move in the same amount as the prices of its put options on the stock indices. It is also possible that there may be a negative correlation between the index and the Fund's securities that would result in a loss on both such securities and the options on stock indices acquired by the Fund.

The hours of trading for options may not conform to the hours during which the underlying securities are traded. To the extent that the options markets close before the markets for the underlying securities, significant price and rate movements can take place in the underlying markets that cannot be reflected in the options markets. The purchase of options is a highly specialized activity that involves investment techniques and risks different from those associated with ordinary portfolio securities transactions. The purchase of stock index options involves the risk that the premium and transaction costs paid by the Fund in purchasing an option will be lost as a result of unanticipated movements in prices of the securities comprising the stock index on which the option is based.

There is no assurance that a liquid secondary market on an options exchange will exist for any particular option, or at any particular time, and for some options no secondary market on an exchange or elsewhere may exist. If the Fund is unable to close out a call option on securities that it has written before the option is exercised, the Fund may be required to purchase the optioned securities in order to satisfy its obligation under the option to deliver such securities. If the Fund is unable to effect a closing sale transaction with respect to

options on securities that it has purchased, it would have to exercise the option in order to realize any profit and would incur transaction costs upon the purchase and sale of the underlying securities.

Cover for Options Positions

Transactions using options (other than options that the Fund has purchased) expose a Fund to an obligation to another party. A Fund will not enter into any such transactions unless it owns either (i) an offsetting ("covered") position in securities or other options or (ii) cash or liquid securities with a value sufficient at all times to cover its potential obligations not covered as provided in (i) above.

Assets used as cover cannot be sold while the position in the corresponding option is open, unless they are replaced with similar assets. As a result, the commitment of a large portion of the Fund's assets to cover could impede portfolio management or the Fund's ability to meet redemption requests or other current obligations.

Options on Futures Contracts

A Fund may purchase and sell options on the same types of futures in which it may invest. Options on futures are similar to options on underlying instruments except that options on futures give the purchaser the right, in return for the premium paid, to assume a position in a futures contract (a long position if the option is a call and a short position if the option is a put), rather than to purchase or sell the futures contract, at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position by the writer of the option to the holder of the option will be accompanied by the delivery of the accumulated balance in the writer's futures margin account which represents the amount by which the market price of the futures contract, at exercise, exceeds (in the case of a call) or is less than (in the case of a put) the exercise price of the option on the futures contract. Purchasers of options who fail to exercise their options prior to the exercise date suffer a loss of the premium paid.

Technology Risk

The Adviser uses various technologies in managing the Funds, consistent with each Fund's investment objective and strategy described in the Prospectus. For example, proprietary and third-party data and systems are utilized to support decision making for each Fund. Data imprecision, software or other technology malfunctions, programming inaccuracies and similar circumstances may impair the performance of these systems, which may negatively impact a Fund.

Temporary Defensive Position

In anticipation of or in response to adverse market, economic, political or other conditions, each Fund may take temporary defensive positions (up to 100% of its assets) in cash, cash equivalents and short term U.S. government securities. If a Fund were to take a temporary defensive position, its opportunity to achieve upside return may be limited; however, the ability to be fully defensive is an integral part of achieving the Fund's investment objective.

Time Deposits and Variable Rate Notes

Each Fund may invest in fixed time deposits, whether or not subject to withdrawal penalties. The commercial paper obligations which a Fund may buy are unsecured and may include variable rate notes. The nature and terms of a variable rate note (*i.e.*, a "Master Note") permit a Fund to invest fluctuating amounts at varying rates of interest pursuant to a direct arrangement between a Fund as lender, and the issuer, as borrower. It permits daily changes in the amounts borrowed. A Fund has the right at any time to increase, up to the full amount stated in the note agreement, or to decrease the amount outstanding under the note. The issuer may prepay at any time and without penalty any part of or the full amount of the note. The note may or may not be backed by one or more bank letters of credit. Because these notes are direct lending arrangements between a Fund and the issuer, it is not generally contemplated that they will be traded; moreover, there is currently no secondary market for them. Except as specifically provided in the Prospectus, there is no limitation on the type of issuer from whom these notes may be purchased; however, in connection with such purchase and on an ongoing basis, the Adviser will consider the earning power, cash flow and other liquidity ratios of the issuer, and its ability to pay principal and interest on demand, including a situation in which all holders

of such notes made demand simultaneously. Variable rate notes are subject to a Fund's investment restriction on illiquid securities unless such notes can be put back to the issuer on demand within seven days.

When-Issued, Forward Commitments and Delayed Settlements

Each Fund will purchase securities on a when-issued, forward commitment or delayed settlement basis only with the intention of completing the transaction. If deemed advisable as a matter of investment strategy, however, the Fund may dispose of or renegotiate a commitment after it is entered into, and may sell securities it has committed to purchase before those securities are delivered to the Fund on the settlement date. In these cases such Fund may realize a taxable capital gain or loss. When the Fund engages in when-issued, forward commitment and delayed settlement transactions, it relies on the other party to consummate the trade. Failure of such party to do so may result in a Fund incurring a loss or missing an opportunity to obtain a price credited to be advantageous.

The market value of the securities underlying a when-issued purchase, forward commitment to purchase securities, or a delayed settlement and any subsequent fluctuations in their market value is taken into account when determining the market value of a Fund starting on the day the Fund agrees to purchase the securities. A Fund does not earn interest on the securities it has committed to purchase until it has paid for and delivered on the settlement date.

INVESTMENT RESTRICTIONS

Each Fund has adopted the following investment restrictions that may not be changed without approval by a "majority of the outstanding shares" of the Fund, which, as used in this SAI, means the vote of the lesser of (a) 67% or more of the shares of the Fund represented at a meeting, if the holders of more than 50% of the outstanding shares of the Fund are present or represented by proxy, or (b) more than 50% of the outstanding shares of the Fund. The Fund may not:

1. Issue senior securities, except as otherwise permitted under the 1940 Act, and the rules and regulations promulgated thereunder;

2. Borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund's total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions;

3. Purchase securities on margin, participate on a joint or joint and several basis in any securities trading account, or underwrite securities. (Does not preclude the Fund from obtaining such short-term credit as may be necessary for the clearance of purchases and sales of its portfolio securities, and except to the extent that the Fund may be deemed an underwriter under the Securities Act, by virtue of disposing of portfolio securities);

4. Purchase or sell real estate or interests in real estate. This limitation is not applicable to investments in marketable securities that are secured by or represent interests in real estate. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts);

5. . Invest more than 25% of the market value of its assets in the securities of companies engaged in any one industry or group of industries. (Does not apply to investments in securities issued or guaranteed as to principal and/or interest by the U.S. Government, its agencies or instrumentalities.) except that the CWP Premium Growth ETF will invest 25% or more of its total assets in the semi-conductor industry;

6 .Purchase or sell commodities (unless acquired as a result of ownership of securities or other investments) or commodity futures contracts, except that the Fund may purchase and sell futures contracts and options to the full extent permitted under the 1940 Act, sell foreign currency contracts in accordance with any rules of the Commodity Futures Trading Commission, invest in securities or other instruments backed by commodities, and invest in companies that are engaged in a commodities business or have a significant portion of their assets in commodities; or

7. Make loans to others, except that the Fund may, in accordance with its investment objective and policies, (i) lend portfolio securities, (ii) purchase and hold debt securities or other debt instruments, including but not limited to loan participations and sub-participations, assignments, and structured securities, (iii) make loans secured by mortgages on real property, (iv) enter into repurchase agreements, (v) enter into transactions where each loan is represented by a note executed by the borrower, and (vi) make time deposits with financial institutions and invest in instruments issued by financial institutions. For purposes of this limitation, the term "loans" shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.

If a restriction on the Fund's investments is adhered to at the time an investment is made, a subsequent change in the percentage of Fund assets invested in certain securities or other instruments of the Fund's investment portfolio, resulting from changes in the value of the Fund's total assets, will not be considered a violation of the restriction; provided, however, that the asset coverage requirement applicable to borrowings shall be maintained in the manner contemplated by applicable law.

With respect to fundamental investment restriction #2 above, if the Fund's asset coverage falls below 300%, the Fund will reduce borrowing within 3 days in order to ensure that the Fund has 300% asset coverage.

With respect to fundamental investment restriction #5 above, the 1940 Act does not define what constitutes "concentration" in an industry. The SEC staff has taken the position that investment of 25% or more of a fund's total assets in one or more issuers conducting their principal activities in the same industry or group of industries constitutes concentration. It is possible that interpretations of concentration could change in the future. The fundamental investment restriction #5 above will be interpreted to refer to concentration as that term may be interpreted from time to time. The policy also will be interpreted to permit investment without limit in the following: securities of the U.S. government and its agencies or instrumentalities; securities of state, territory, possession or municipal governments and their authorities, agencies, instrumentalities or political subdivisions; and repurchase agreements collateralized by any such obligations. Accordingly, issuers of the foregoing securities will not be considered to be members of any industry. There also will be no limit on investment in issuers domiciled in a single jurisdiction or country. Finance companies will be considered to be in the industries of their parents if their activities are primarily related to financing the activities of the parents. Each foreign government will be considered to be a member of a separate industry. With respect to the Funds' industry classifications, each Fund currently utilizes any one or more of the industry sub-classifications used by one or more widely recognized market indices or rating group indices, and/or as defined by Funds management. The Adviser may analyze the characteristics of a particular issuer and security and assign an industry classification consistent with those characteristics in the event that either a third-party classification provider used by the Adviser or another Fund service provider does not assign a classification or assigns a classification inconsistent with that believed appropriate by the Adviser based on its analysis of the economic characteristics of the issuer. With respect to the fundamental policy relating to concentration set forth in fundamental investment restriction #5 above, if a Fund invests in one or more investment companies that concentrates its investments in a particular industry, that Fund will examine its other investment company holdings to ensure that such Fund is not indirectly concentrating its investments in a particular industry. It is possible for the value of a Fund's net assets invested in an industry in which it does not have a policy to concentrate to exceed 25% due to factors other than an investment made by the Fund, such as fluctuations in the market value of the Fund's portfolio investments. During times when a Fund is experiencing such a passive exceedance of the 25% limit, the Fund may continue to accept orders for the purchase of Creation Units that include one or more investments in the relevant industry or cash-in-lieu of such investments (and subsequent purchase of such investments with the cash-in-lieu amount) consistent with SEC guidance and applicable law.

POLICIES AND PROCEDURES FOR DISCLOSURE OF PORTFOLIO HOLDINGS

The Trust has adopted policies and procedures that govern the disclosure of the Fund's portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of the Fund's shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Trust shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings information does not create conflicts between the interests of the Trust's shareholders and those of the Trust's affiliates.

Each Fund's portfolio holdings are, or will be, disclosed on such Fund's website at www.cwpfunds.com each day the Fund is open for business. Each Fund's portfolio holdings information will also generally be provided for dissemination through the facilities of the National Securities Clearing Corporation ("NSCC") and/or other fee-based subscription services to NSCC members and/or subscribers to those other fee-based subscription services, including Authorized Participants (as defined below), and to entities that publish and/or analyze such information in connection with the process of purchasing or redeeming Creation Units or trading shares of the Fund in the secondary market. This information typically reflects the Fund's anticipated holdings as of the next Business Day.

Each Fund also discloses its portfolio holdings by mailing its annual and semi-annual reports to shareholders approximately two months after the end of the fiscal year and semi-annual period. The Fund also discloses its portfolio holdings reports on Form N-CSR and Form N-PORT two months after the end of each semi-annual period and quarter, respectively.

Each Fund may choose to make portfolio holdings available to rating agencies such as Lipper, Morningstar or Bloomberg earlier and more frequently on a confidential basis.

Under limited circumstances, as described below, a Fund's portfolio holdings may be disclosed to, or known by, certain third parties in advance of their posting on the Funds' website or their filing with the SEC on Form N-CSR or Form N-PORT, as applicable. In each case, a determination has been made by the Trust's Chief Compliance Officer that such advance disclosure is supported by a legitimate business purpose of the Fund and that the recipient is subject to a duty to keep the information confidential.

- **The Adviser and Sub-Adviser.** Personnel of the Adviser, including personnel responsible for managing the Funds' portfolio, may have full daily access to each Fund's portfolio holdings since that information is necessary in order for the Adviser to provide its management, administrative and investment services to the Fund. Personnel of the Sub-Adviser may have full daily access to the Funds' portfolio holdings since that information is necessary in order for the Sub-Adviser to provide trading services for the Funds. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, demand and liquidity of such securities, as well as for the assistance of the portfolio managers in the trading of such securities, Adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

- **Ultimus Fund Solutions, LLC** is the fund accountant, administrator and custody administrator for each Fund; therefore, its personnel have full daily access to the Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

- **U.S. Bank, N.A.** is custodian for the Funds; therefore, its personnel have full daily access to each Fund's portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

- **Deloitte & Touche LLP** is the Funds' independent registered public accounting firm; therefore, its personnel have access to each Fund's portfolio holdings in connection with auditing of each Fund's annual financial statements and providing assistance and consultation in connection with SEC filings.

- **Blank Rome LLP** is counsel to the Funds; therefore, its personnel have access to each Fund's portfolio holdings in connection with review of each Fund's annual and semi-annual shareholder reports and SEC filings.

Additions to List of Approved Recipients. The Trust's Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of the Funds' portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information in connection with the operation or administration of the Fund, as determined by the Trust's Chief Compliance Officer, and must be subject to a duty to keep the information confidential. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Funds, the Adviser, the Sub-Adviser or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Fund's portfolio holdings.

Compliance With Portfolio Holdings Disclosure Procedures. The Trust's Chief Compliance Officer will report periodically to the Board with respect to compliance with the Fund's portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect the Funds from the potential misuse of holdings information by individuals or firms in possession of that information.

MANAGEMENT

The business of the Trust is managed under the direction of the Board in accordance with the Agreement and Declaration of Trust and the Trust's By-laws (collectively, the "Governing Documents"), which have been filed with the SEC and are available upon request. The Board consists of four individuals, all of whom are not "interested persons" (as defined under the 1940 Act) of the Trust and the Adviser and Sub-Adviser ("Independent Trustees"). Pursuant to the Governing Documents of the Trust, the Trustees shall elect officers including, but not limited to, a President, a Secretary, a Treasurer, and a Chief Compliance Officer. The Board retains the power to conduct, operate and carry on the business of the Trust and has the power to incur and pay any expenses, which, in the opinion of the Board, are necessary or incidental to carry out any of the Trust's purposes. The Trustees, officers, employees and agents of the Trust, when acting in such capacities, shall not be subject to any personal liability except for his or her own bad faith, willful misfeasance, gross negligence or reckless disregard of his or her duties.

Board Leadership Structure. The Board is led by Mark Gersten, who has served as the Chairman of the Board since the Trust was first registered with the SEC in 2012. Under the Trust's Agreement and Declaration of Trust and By-Laws, the Chairman of the Board is responsible for (a) presiding at Board meetings, (b) calling special meetings on an as-needed basis, and (c) execution and administration of Trust policies, including (i) setting the agendas for Board meetings and (ii) providing information to Board members in advance of each Board meeting and between Board meetings. Generally, the Trust believes it best to have a non-executive Chairman of the Board, who together with the President (principal executive officer), are seen by our shareholders, business partners and other stakeholders as providing strong leadership. The Trust believes that its Chairman, the independent chair of the Audit Committee, and, as an entity, the full Board of Trustees, provide effective leadership that is in the best interests of the Trust, each Fund and each shareholder.

Board Risk Oversight. The Board of Trustees is comprised entirely of Independent Trustees and has established an Audit Committee (the "Audit Committee") and a Nominating and Corporate Governance Committee (the "Corporate Governance Committee"), each with a separate chair. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its Chief Compliance Officer at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial and reporting risk within its area of responsibilities.

Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the Chief Compliance Officer is the primary recipient and communicator of such risk-related information.

Trustee Qualifications. Generally, the Trust believes that each Trustee is competent to serve because of their individual overall merits including: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills. Mark Garbin has over 40 years of experience in corporate balance sheet and income statement risk management for large asset managers. Mr. Garbin has extensive derivatives experience and has provided consulting services to alternative asset managers. Mr. Garbin holds both a Chartered Financial Analyst ("CFA") and Professional Risk Manager ("PRM") designation and has earned and holds advanced degrees in international business, negotiation and derivatives. Mark Gersten has over 40 years of business experience in the investment management business with a focus on mutual funds and alternative funds. He serves as a member of other mutual fund boards outside of the Fund Complex and possesses a strong understanding of the regulatory framework under which investment companies must operate based on his service to this board and extensive experience administering mutual funds. Mr. Gersten is a certified public accountant and holds an MBA in accounting. Neil Kaufman has over 40 years of experience as a corporate and securities attorney and possesses a deep understanding of the securities industry in general and financial statements in particular. Mr. Kaufman has previously served as the Chairman of a NASDAQ-listed technology company and the Chairman of the

Banking & Securities Law committee of the Nassau County Bar Association. Anita Krug has 9 years of experience as an attorney advising investment companies and investment advisory firms, particularly those managing hedge funds. She also has extensive experience as a law professor whose scholarship addresses such topics as the fiduciary duties of investment advisers and broker dealers, commodity futures regulation, and corporate structure and governance. The Trust does not believe any one factor is determinative in assessing a Trustee's qualifications, but that the collective experience of each Trustee makes them well qualified.

Trustees and Officers. The Trustees and officers of the Trust, together with information as to their principal business occupations during the past five years and other information, are shown below. The business address of each Trustee and Officer is 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246. All correspondence to the Trustees and Officers should be directed to c/o Ultimus Fund Solutions, LLC, PO Box 46707, Cincinnati, OH 45246.

* Information as of the date of this SAI.

**As of the date of this SAI, 2026, the Trust is comprised of 21 active portfolios managed by 10 unaffiliated investment advisers. The term "Fund Complex" applies only to those funds that (i) are advised by a common investment adviser or by an investment adviser that is an affiliated person of the investment adviser of any of the other funds in the Trust or (ii) hold themselves out to investors as related companies for purposes of investment and investor services. The Funds do not hold itself out as related to any other series within the Trust.

Audit Committee. The Board has an Audit Committee that consists of all of the Trustees, none of whom is an "interested person" of the Trust within the meaning of the 1940 Act. The Audit Committee's responsibilities include, among other things: (i) the selection, retention or termination of the Trust's independent auditors and approval of audit and non-audit services to be provided by the independent auditors; (ii) reviewing with the independent auditors the scope, performance and anticipated cost of their audit; (iii) discussing with the independent auditors certain matters relating to the Trust's financial statements, including any adjustment to such financial statements recommended by such independent auditors, or any other results of any audit; (iv) reviewing on a periodic basis a formal written statement from the independent auditors with respect to their independence, discussing with the independent auditors any relationships or services disclosed in the statement that may impact the objectivity and independence of the Trust's independent auditors and recommending that the Board take appropriate action in response thereto to satisfy itself of the auditor's independence; and (v) considering the comments of the independent auditors and management's responses thereto with respect to the quality and adequacy of the Trust's accounting and financial reporting policies

and practices and internal controls. The Audit Committee operates pursuant to an Audit Committee Charter. During the fiscal year ended July 31, 2026, the Audit Committee held nine meetings.

Corporate Governance Committee. On December 10, 2024, the Board reconstituted the Corporate Governance Committee. The Corporate Governance Committee consists of all of the Trustees, all of whom are not "interested persons" of the Trust within the meaning of the 1940 Act. Ms. Krug is the Chair of the Corporate Governance Committee. The Corporate Governance Committee's responsibilities include, among other things: (i) to identify and recommend individuals qualified to become Trustees and members of Board committees, as well as evaluate and make recommendations to the Board regarding trustee qualifications, selection criteria and Board size and composition; (ii) to periodically review and make recommendations with respect to the Board's corporate governance policies and procedures and the Trust's code of ethics; (iii) to monitor data submitted to the Board by individual trustees that may be relevant for evaluating independence and make recommendations to the Board regarding action, if any, that may be required or appropriate; (iv) to oversee an annual self-assessment of the Board's and Board committees' performance; and (v) to review and reassess annually trustee compensation and, if appropriate, recommend changes in Trustee compensation to the Board. The Corporate Governance Committee will consider nominees recommended by shareholders. Recommendations should be submitted to the Committee in care of the Trust's Secretary. During the fiscal year ended July 31, 2026, the Corporate Governance Committee did not meet.

Compensation of Trustees. Effective January 1, 2026, the Trust pays each Independent Trustee a fee of $100,000 per annum, as well as reimbursements for any reasonable expenses incurred attending the meetings, to be paid at the end of each calendar quarter. In addition, the Chairman of the Board receives an additional annual fee of $20,000 and the Chairman of the Audit Committee receives an additional annual fee of $15,000. The Chairperson of the Corporate Governance Committee receives and additional annual fee of $5,000. The Trust also pays each Independent Trustee a fee of $1,000 for each Board meeting (and/or Committee meeting held in connection with such a Board meeting) other than a regularly scheduled meeting (a "Special Meeting"), except that the Audit Committee will permit up to four Special Meetings a year without any additional fees.

No "interested persons" who serves as a Trustee of the Trust will receive any compensation for their services as Trustee. None of the executive officers receive compensation from the Trust. The Trust does not have a bonus, profit sharing, deferred compensation, pension or retirement plan.

The table below details the amount of compensation the Trustees received from the Fund Complex during the fiscal year ended December 31, 2025.* The Trust does not have a bonus, profit sharing, deferred compensation, pension or retirement plan. The Fund had not commenced operation as of that date and thus did not pay Trustee fees during such fiscal period.

Name and Position	Aggregate Compensation From Premium Growth ETF	Aggregate Compensation From Premium Dividend ETF	Total Compensation From Fund Complex Paid to Trustees*
Mark Garbin	$0	$0	$0
Mark Gersten	$0	$0	$0
Neil Kaufman	$0	$0	$0
Anita Krug	$0	$0	$0

* The Trustees' fees are allocated equally to each series in the Trust. The Trust is comprised of multiple series with differing fiscal year ends. The compensation paid to the Board of Trustees is determined on a calendar quarter basis. The term "Fund Complex" refers only to the Funds. For the fiscal year ended July 31, 2026, the aggregate Independent Trustees' fees paid by the entire Trust were $390,000.

Trustees' Ownership of Shares in the Fund. As of December 31, 2025, the Trustees beneficially owned the following amounts in the Fund and the family of investment companies overseen by the Trustee.

Name of Trustee	Dollar Range of Equity Securities in Premium Growth ETF*	Dollar Range of Equity Securities in Premium Dividend ETF*	Aggregate Dollar Range of Equity Securities in All Registered Investment Companies Overseen by Trustee in Family of Investment Companies**
Mark Garbin	None	None	None
Mark Gersten	None	None	None
Neil Kaufman	None	None	None
Anita Krug	None	None	None

* As of the date of this SAI, the Fund has not commenced operations and does not have any equity securities outstanding.

** Refers to all series of the Trust.

Management Ownership

Because there were no shares of the Fund outstanding as of the date of this SAI, the Trustees and officers, as a group, owned 0% of each of the Fund's outstanding shares. As of the date of this SAI, the Trustees and officers, as a group, owned less than 1% of each of the Fund Complex's outstanding shares.

CONTROL PERSONS AND PRINCIPAL HOLDERS

A principal shareholder is any person who owns (either of record or beneficially) 5% or more of the outstanding shares of a fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control.

As of the date of this SAI, there were no shares of the Fund outstanding, and no shareholder(s) of record owned 5% or more of the outstanding shares of the Fund.

INVESTMENT ADVISER AND TRADING SUB-ADVISER

Capital Wealth Planning, LLC ("CWP" or the "Adviser"), located at 9015 Strada Stell CT, STE 203 Naples, Florida 34109, serves as the Funds' investment adviser. The Adviser is registered with the SEC as an investment adviser under the Investment Advisers Act of 1940, as amended.

Subject to the authority of the Board, the Adviser is responsible for the overall management of each Fund's investment-related business affairs. Pursuant to an investment advisory agreement (the "Advisory Agreement") with the Trust, on behalf of the Funds, the Adviser, subject to the supervision of the Board, and in conformity with the stated policies of the Funds, manages the portfolio investment operations of the Funds. The Adviser has overall supervisory responsibilities for the general management and investment of each Fund's securities portfolio, as detailed below, which are subject to review and approval by the Board. In general, the Adviser's duties include setting each Fund's overall investment strategies and asset allocation.

Pursuant to the Advisory Agreement, the Adviser, under the supervision of the Board, agrees to invest the assets of the Fund in accordance with applicable law and the investment objective, policies and restrictions set forth in the Funds' current prospectus and SAI, and subject to such further limitations as the Trust may from time to time impose

by written notice to the Adviser. Pursuant to the Advisory Agreement, the adviser shall act as the investment adviser to each Fund and, as such shall, (i) obtain and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities under the Investment Advisory Agreement, (ii) formulate a continuing program for the investment of the assets of each Fund in a manner consistent with its investment objective, policies and restrictions, and (iii) determine from time to time securities to be purchased, sold, retained or lent by the Fund, and implement those decisions, including the selection of entities with or through which such purchases, sales or loans are to be effected; provided, that the Adviser will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer, (a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers. The Adviser also provides each Fund with all necessary office facilities and personnel for servicing such Fund's investments, compensates all officers, Trustees and employees of the Trust who are officers, directors or employees of the Adviser, and all personnel of such Fund or the Adviser performing services relating to research, statistical and investment activities.

Under the Investment Advisory Agreement, the Adviser is entitled to receive an annual management fee from each Fund, calculated daily and payable monthly, as a percentage of each Fund's average daily net assets, based on the greater of (1) a $50,000 minimum fee or (2) the daily net assets of the respective Fund in accordance with the following fee schedule: the $50,000 minimum fee or 0.060% on the first $250 million in assets, 0.050% on the second $250 million, and 0.040% for assets above $500 million.

The management fee is paid in its entirety to the Sub-Adviser by the Adviser. The current sub-advisory fee with respect to each Fund, which the Adviser pays out of the management fee received from the Fund under the Investment Advisory Agreement with respect to each respective Fund, is computed daily at an annual rate based on the greater of (1) a $50,000 minimum fee or (2) the daily net assets of the respective Fund in accordance with the following fee schedule: the $50,000 minimum fee or 0.060% on the first $250 million in assets, 0.050% on the second $250 million, and 0.040% for assets above $500 million. The $50,000 minimum assumes the Adviser engages with one of the Sub-Adviser's currently established prime broker partners relationships. To the extent that the Adviser wishes to engage with a different prime broker, the Sub-Adviser will charge a $50,000 one-time fee. See also "Sub-Adviser and Sub-Advisory Agreement" below.

In addition to investment advisory fees, the Funds pays other expenses including costs incurred in connection with the maintenance of its securities law registration, printing and mailing prospectuses and Statements of Additional Information to shareholders, certain financial accounting services, taxes or governmental fees, custodial, transfer and shareholder servicing agent costs, expenses of outside counsel and independent accountants, preparation of shareholder reports and expenses of trustee and shareholders meetings.

The Investment Advisory Agreement will continue in effect for two years initially and thereafter shall continue from year to year provided such continuance is approved at least annually by (a) a vote of the majority of the Independent Trustees, cast at a meeting specifically called for the purpose of voting on such approval and by (b) the majority vote of either all of the Trustees or the vote of a majority of the outstanding shares of the applicable Fund. The Investment Advisory Agreement may be terminated with respect to a Fund without penalty on 60 days' written notice by a vote of a majority of the Trustees, the Adviser, or by holders of a majority of the Trust's outstanding shares. The Investment Advisory Agreement shall terminate automatically in the event of its assignment.

The Investment Advisory Agreement with respect to each of the Funds was approved by the Board of the Trust, including a majority of the Independent Trustees, at a meeting held on September 29, 2026.

Expenses not expressly assumed by the Adviser under the Investment Advisory Agreement are paid by the Fund. Under the terms of the Investment Advisory Agreement, the Fund is responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser or Distributor (as defined under the section entitled "The Distributor"), (c) the fees and certain expenses of the Custodian (as defined under the section entitled "Custodian") and Transfer and Dividend Disbursing Agent (as defined under the section entitled "Transfer Agent"), including the cost of maintaining certain required records of the Fund and of pricing the Fund's shares, (d) the charges and expenses of legal counsel and independent

accountants for the Fund, (e) brokerage commissions and any issue or transfer taxes chargeable to the Fund in connection with its securities transactions, (f) all taxes and corporate fees payable by the Fund to governmental agencies, (g) the fees of any trade association of which the Fund may be a member, (h) the cost of share certificates representing shares of the Fund, (i) the cost of fidelity and liability insurance, (j) the fees and expenses involved in registering and maintaining registration of the Fund and of shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of the Fund's registration statements and prospectuses for such purposes, (k) all expenses of shareholders and Trustees' meetings (including travel expenses of trustees and officers of the Trust who are directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders and (l) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund's business. The Investment Advisory Agreement continues from year to year provided such continuance is approved at least annually by (a) a vote of the majority of the Independent Trustees, cast in person at a meeting specifically called for the purpose of voting on such approval and by (b) the majority vote of either all of the Trustees or the vote of a majority of the outstanding shares of the Fund. The Investment Advisory Agreement may be terminated without penalty on 60 days' written notice by a vote of a majority of the Trustees, the Adviser, or by holders of a majority of that Trust's outstanding shares. The Investment Advisory Agreement shall terminate automatically in the event of its assignment.

Sub-Adviser and Sub-Advisory Agreement

The Adviser has engaged Vident Asset Management, 1125 Sanctuary Pkwy., Suite 515, Alpharetta, GA 30009 to serve as trading sub-adviser to the Funds.

Pursuant to the Sub-Advisory Agreement, the Sub-Adviser, under the supervision of the Adviser, agrees to implement portfolio investment decisions made by the Adviser for the Funds in accordance with applicable law and the investment objective, policies and restrictions set forth in the Funds' current Prospectus and this Statement of Additional Information, and subject to such further limitations as the Trust may from time to time impose by written notice to the Adviser or Sub-Adviser. However, the Sub-Adviser is not responsible for management of the Funds' investments. As compensation for the trading sub-advisory services it provides to the Funds, the Adviser pays the Sub-Adviser a monthly fee.

The fee paid to the Sub-Adviser by the Adviser will be paid by the Adviser and is not an additional cost to the Funds. The Sub-Advisory Agreement is effective for an initial two-year period and continue in effect for successive twelve-month periods, provided that the Board annually approves the Sub-Advisory Agreement for continuance.

The Sub-Advisory Agreement shall continue in effect for two (2) years initially and then from year to year, provided it is approved at least annually by a vote of the majority of the Trustees, who are not parties to the agreement or interested persons of any such party, cast in person at a meeting specifically called for the purpose of voting on such approval. The Sub-Advisory Agreement may be terminated without penalty at any time by the Adviser or the Sub-Adviser on 60 days written notice, and will automatically terminate in the event of its "assignment" (as that term is defined in the 1940 Act).

The Sub-Advisory Agreement with respect to each of the Funds was approved by the Board of the Trust, including a majority of the Independent Trustees, at a meeting held on September 29, 2026.

Codes of Ethics

The Trust, the Adviser, the Sub-Adviser and the Distributor each have adopted codes of ethics under Rule 17j-1 under the 1940 Act that govern the personal securities transactions of their board members, officers and employees who may have access to current trading information of the Trust. Under the code of ethics adopted by the Trust (for purposes of this subsection only, the "Code"), the Trustees are permitted to invest in securities that may also be purchased by each Fund.

In addition, the Trust has adopted a separate code of ethics that applies only to the Trust's executive officers to ensure that these officers promote professional conduct in the practice of corporate governance and management. The purpose behind these guidelines is to promote i) honest and ethical conduct, including the ethical handling of

actual or apparent conflicts of interest between personal and professional relationships; ii) full, fair, accurate, timely, and understandable disclosure in reports and documents that a registrant files with, or submits to, the SEC and in other public communications made by the Fund; iii) compliance with applicable governmental laws, rule and regulations; iv) the prompt internal reporting of violations of this Code to an appropriate person or persons identified in the Code; and v) accountability for adherence to the Code.

Proxy Voting Policies

The Board has adopted Proxy Voting Policies and Procedures ("Policies") on behalf of the Trust, which delegate the responsibility for voting proxies to the Adviser, as applicable, subject to the Board's continuing oversight. The Policies require that the Adviser vote proxies received in a manner consistent with the best interests of each Fund and its shareholders. The Policies also require the Adviser to present to the Board, at least annually, the Adviser's Proxy Voting Policies and a record of each proxy voted by the Adviser on behalf of each Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest.

Where a proxy proposal raises a material conflict between the Adviser's interests and a Fund's interests, the Adviser will resolve the conflict by voting in accordance with the policy guidelines or at the client's directive using the recommendation of an independent third party. If the third party's recommendations are not received in a timely fashion, the Adviser will abstain from voting the securities held by that client's account. A copy of the Adviser's proxy voting policies are attached hereto as Appendix A.

More information. Information regarding how each Fund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available (1) without charge, upon request, by calling the Funds at 1-855-340-1507 and such information will be sent within three business days of receipt of a request and (2) on the SEC's website at http://www.sec.gov.

THE DISTRIBUTOR

Northern Lights Distributors, LLC, located at 4221 North 203rd Street, Ste. 100, Elkhorn, Nebraska (the "Distributor") serves as the principal underwriter and national distributor for the shares of the Fund pursuant to an ETF Distribution Agreement with the Trust (the "ETF Distribution Agreement"). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state's securities laws and is a member of the FINRA. The offering of each Fund's shares is continuous. The ETF Distribution Agreement provides that the Distributor, as agent in connection with the distribution of each Fund's shares, will use reasonable efforts to facilitate the sale of each Fund's shares.

The ETF Distribution Agreement provides that, unless sooner terminated with respect to a Fund, it will continue in effect for two years initially and thereafter shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Trustees who are not interested persons of the Trust or of the Distributor by vote cast in person at a meeting called for the purpose of voting on such approval.

The ETF Distribution Agreement may be terminated with respect to a Fund at any time, without the payment of any penalty, by vote of a majority of the entire Board of the Trust or by vote of a majority of the outstanding shares of the Fund on 60 days written notice to the Distributor, or by the Distributor at any time, without the payment of any penalty, on 60 days written notice to the Fund. The ETF Distribution Agreement will automatically terminate in the event of its assignment.

The Distributor may enter into selling agreements with broker-dealers that solicit orders for the sale of shares of the Fund and may allow concessions to dealers that sell shares of the Funds.

Rule 12b-1 Plan

The Trust has adopted a Distribution Plan pursuant to Rule 12b-1 under the 1940 Act (the "Plan") for Shares pursuant to which the Funds are authorized to pay the Distributor, as compensation for Distributor's account maintenance services under the Plan. The Board has approved a distribution and shareholder servicing fee at the rate of up to 0.25%

of the Funds' average daily net assets. Such fees are to be paid by the Funds monthly, or at such other intervals as the Board shall determine. Such fees shall be based upon the Funds' average daily net assets during the preceding month, and shall be calculated and accrued daily. The Funds may pay fees to the Distributor at a lesser rate, as agreed upon by the Board of Trustees of the Trust and the Distributor. The Plan authorizes payments to the Distributor as compensation for providing account maintenance services to each Fund's shareholders, including arranging for certain securities dealers or brokers, administrators and others ("Recipients") to provide these services and paying compensation for these services. The Funds will bear their own costs of distribution with respect to its shares. The Plan was adopted in order to permit the implementation of the Funds' method of distribution. No fees are currently paid by the Fund under the Plan, and there are no current plans to impose such fees. In the event such fees were to be charged, over time they would increase the cost of an investment in the Fund.

The services to be provided by Recipients may include, but are not limited to, the following: assistance in the offering and sale of Funds' shares and in other aspects of the marketing of the shares to clients or prospective clients of the respective recipients; answering routine inquiries concerning the Funds; assisting in the establishment and maintenance of accounts or sub-accounts in the Funds and in processing purchase and redemption transactions; making the Funds' investment plan and shareholder services available; and providing such other information and services to investors in shares of the Funds as the Distributor or the Trust, on behalf of the Funds, may reasonably request. The distribution services shall also include any advertising and marketing services provided by or arranged by the Distributor with respect to the Funds.

The Distributor is required to provide a written report, at least quarterly to the Board of Trustees of the Trust, specifying in reasonable detail the amounts expended pursuant to the Rule 12b-1 Plan and the purposes for which such expenditures were made. Further, the Distributor will inform the Board of any Rule 12b-1 fees to be paid by the Distributor to Recipients.

The initial term of the Plan is one year and will continue in effect from year to year thereafter, provided such continuance is specifically approved at least annually by a majority of the Board of Trustees of the Trust and a majority of the Trustees who are not "interested persons" of the Trust and do not have a direct or indirect financial interest in the Plan ("Rule 12b-1 Trustees") by votes cast in person at a meeting called for the purpose of voting on the Plan. The Plan may be terminated at any time by the Trust or the Funds by vote of a majority of the Rule 12b-1 Trustees or by vote of a majority of the outstanding voting shares of the respective Fund.

The Plan may not be amended to increase materially the amount of the Distributor's compensation to be paid by the Fund, unless such amendment is approved by the vote of a majority of the outstanding voting securities of the affected class of the Funds (as defined in the 1940 Act). All material amendments must be approved by a majority of the Board of Trustees of the Trust and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on the Plan. During the term of the Plan, the selection and nomination of non-interested Trustees of the Trust will be committed to the discretion of current non-interested Trustees. The Distributor will preserve copies of the Plan, any related agreements, and all reports, for a period of not less than six years from the date of such document and for at least the first two years in an easily accessible place.

Any agreement related to the Plan will be in writing and provide that: (a) it may be terminated by the Trust or the Fund at any time upon sixty days' written notice, without the payment of any penalty, by vote of a majority of the respective Rule 12b-1 Trustees, or by vote of a majority of the outstanding voting securities of the Trust or the Fund; (b) it will automatically terminate in the event of its assignment (as defined in the 1940 Act); and (c) it will continue in effect for a period of more than one year from the date of its execution or adoption only so long as such continuance is specifically approved at least annually by a majority of the Board and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on such agreement. No "interested person" (as defined in the 1940 Act) of the Funds nor any Trustee had a direct or indirect financial interest in the operation of the plans or related agreements.

PORTFOLIO MANAGERS

Kevin Simpson, Josh Smith, CFA and Ryland Mathews, CFA (the "Portfolio Managers") serve as the portfolio managers of the Premium Growth ETF. Kevin Simpson and Josh Smith, CFA serve as the portfolio managers of the Premium Dividend ETF. The tables below include details about the type, number, and assets under management for the various types of other accounts managed by the Portfolio Managers, and the total assets in the accounts with respect to which the advisory fee is based on the performance of the accounts. The information is as of September 30, 2026.

Kevin Simpson

Total Other Accounts By Type	Total Number of Accounts by Account Type	Total Assets By Account Type (in millions)	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee
Registered Investment Companies	3	$9,944	0	$0

Conflicts of Interest

In addition to advising the Funds, the Adviser manages assets for other separately managed accounts. Many of the Adviser's clients participate in investment programs that have investment objectives, policies and strategies that are substantially similar to the Funds. Other clients of the Adviser may have differing investment programs, objectives, policies and strategies. In general, when a portfolio manager has responsibility for managing more than one account, potential conflicts of interest may arise. Those conflicts could include preferential treatment of one account over others in terms of allocation of resources or of investment opportunities. For instance, the Adviser may receive fees from certain accounts that are higher than the fee it receives from the Funds, or the Adviser could receive performance-based fees on certain accounts. The procedures to address conflicts of interest, if any, are described below.

The Adviser attempts to avoid conflicts of interest that may arise as a result of the management of multiple client accounts. From time to time, a portfolio manager may recommend or cause a client to invest in a security or other instrument in which another client of the Adviser has an ownership position. The Adviser has adopted certain procedures intended to treat all client accounts in a fair and equitable manner. To the extent that the portfolio manager seeks to purchase or sell the same security or other instrument for multiple client accounts, the Adviser may aggregate, or bunch, these orders where the portfolio manager deems this to be appropriate and consistent with applicable regulatory requirements. When a bunched order is filled in its entirety, each participating client account will participate at the average share prices for the bunched order. When a bunched order is only partially filled, the securities or other instruments purchased will be allocated on a pro-rata basis to each account participating in the bunched order based upon the initial amount requested for the account, subject to certain exceptions. Each participating account will receive the average share price for the bunched order on the same business day.

Compensation

As of the date of this SAI, the Portfolio Managers are compensated through a combination of base salary, discretionary bonus and equity participation.

Ownership of Securities

As of the date of this SAI, none of the Portfolio Managers beneficially own any securities of each Fund.

ALLOCATION OF PORTFOLIO BROKERAGE

Specific decisions to purchase or sell securities for the Funds are made by the portfolio managers who are employees of the Adviser. The Adviser and the Sub-Adviser are authorized by the Trustees to allocate the orders placed by them on behalf of each Fund to brokers or dealers who may, but need not, provide research or statistical material or other services to the Funds or the Adviser or Sub-Adviser for a Fund's use. Such allocation is to be in such amounts and proportions as the Adviser or Sub-Adviser may determine.

In selecting a broker or dealer to execute each particular transaction, the Adviser and Sub-Adviser will take the following into consideration:

- the best net price available;
- the reliability, integrity and financial condition of the broker or dealer;
- the size of and difficulty in executing the order; and
- the value of the expected contribution of the broker or dealer to the investment performance of the Fund on a continuing basis.

Brokers or dealers executing a portfolio transaction on behalf of the Funds may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage and research services

provided to the Fund. In allocating portfolio brokerage, the Adviser or Sub-Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser or Sub-Adviser exercises investment discretion. Some of the services received as the result of Fund transactions may primarily benefit accounts other than a Fund, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit a Fund.

PORTFOLIO TURNOVER

A Fund's portfolio turnover rate is calculated by dividing the lesser of purchases or sales of portfolio securities for the fiscal year by the monthly average of the value of the portfolio securities owned by the Fund during the fiscal year. The calculation excludes from both the numerator and the denominator securities with maturities at the time of acquisition of one year or less. High portfolio turnover involves correspondingly greater brokerage commissions and other transaction costs, which will be borne directly by a Fund. A 100% turnover rate would occur if all of a Fund's portfolio securities were replaced once within a one-year period.

OTHER SERVICE PROVIDERS

Fund Administration

Ultimus Fund Solutions, LLC, (the "Administrator"), which has its principal office at 225 Pictoria Drive, Suite 450 Cincinnati, OH 45246, and is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. The Administrator is an affiliate of the Distributor.

Pursuant to an ETF Fund Services Agreement with the Funds, the Administrator provides administrative services to each Fund, subject to the supervision of the Board. The Administrator may provide persons to serve as officers of the Fund. Such officers may be directors, officers or employees of the Administrator or its affiliates.

The ETF Fund Services Agreement is dated September 28, 2021. The ETF Fund Services Agreement was initially approved by the Board with respect to the Funds at a meeting held on September 29, 2026. The ETF Fund Services Agreement is in effect for two years from its initial approval and is subject to annual approval of the Board for one-year periods thereafter. The ETF Fund Services Agreement is terminable by the Board or the Administrator on ninety days' written notice and may be assigned provided the non-assigning party provides prior written consent. This ETF Fund Services Agreement provides that in the absence of willful misconduct, bad faith or gross negligence on the part of the Administrator or reckless disregard of its obligations thereunder, the Administrator shall not be liable for any action or failure to act in accordance with its duties thereunder.

Under the ETF Fund Services Agreement, the Administrator provides facilitating administrative services, including: (i) providing services of persons competent to perform such administrative and clerical functions as are necessary to provide effective administration of the Fund; (ii) facilitating the performance of administrative and professional services to the Funds by others, including the Funds' Custodian; (iii) preparing, but not paying for, the periodic updating of the Funds' Registration Statement, Prospectus and Statement of Additional Information in conjunction with Fund counsel, including the printing of such documents for the purpose of filings with the SEC and state securities administrators, and preparing reports to the Funds' shareholders and the SEC; (iv) preparing in conjunction with Fund counsel, but not paying for, all filings under the securities or "Blue Sky" laws of such states or countries as are designated by the Distributor, which may be required to register or qualify, or continue the registration or qualification, of the Funds and/or their shares under such laws; (v) preparing notices and agendas for meetings of the Board and minutes of such meetings in all matters required by the 1940 Act to be acted upon by the Board; (vi) monitoring sales of Shares and ensure that the Shares are properly and duly listed with the applicable securities exchanges; and (vii) monitoring daily and periodic compliance with respect to all requirements and restrictions of the 1940 Act, the Internal Revenue Code and the Prospectuses.

The Administrator also provides each Fund with accounting services, including: (i) daily computation of NAV; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of the Fund's listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for the Fund; (vi) maintaining certain books and records described in Rule 31a-1 under the 1940 Act, and reconciling account information and balances among the Fund's custodian and Adviser; and (vii) monitoring

and evaluating daily income and expense accruals, and sales and redemptions of shares of the Fund ; and (viii) creating the Fund's daily portfolio composition file ("PCF"), assisting with inputting the PCF into the NSCC system and facilitating any other communications required by the NSCC related to the PCFs.

For the administrative services rendered to each Fund by the Administrator under the ETF Fund Services Agreement, the Administrator is entitled to receive the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets for fund administration and fund accounting. For the fund accounting services rendered to each Fund under the ETF fund Services Agreement, each Fund pays the Administrator the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets. The Administrator is also entitled to reimbursement for any out of pocket expenses.

Transfer Agent

U.S. Bank, N.A (U.S. Bank), acts as transfer, dividend disbursing, and shareholder servicing agent for the Funds pursuant to the Custodian and Transfer Agent Agreement between U.S. Bank and the Trust on behalf of the Funds (the "Transfer Agent"). Under the Agreement, the Transfer Agent is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations.

Custodian

U.S. Bank, (the "Custodian"), serves as the custodian of each Fund's assets pursuant to a Custodian and Transfer Agreement by and between the Custodian and the Trust on behalf of the Funds. The Custodian's responsibilities include safeguarding and controlling a Fund's cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on the Fund's investments. Pursuant to the Custodian and Transfer Agent Agreement, the Custodian also maintains original entry documents and books of record and general ledgers; posts cash receipts and disbursements; and records purchases and sales based upon communications from the Adviser. A Fund may employ foreign sub-custodians that are approved by the Board to hold foreign assets.

Chief Compliance Officer

Northern Lights Compliance Services, LLC ("NLCS"), 4221 North 203rd Street, Suite 100, Elkhorn, Nebraska 68022, an affiliate of the Administrator and the Distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. NLCS's compliance services consist primarily of reviewing and assessing the policies and procedures of the Trust and its service providers pertaining to compliance with applicable federal securities laws, including Rule 38a-1 under the 1940 Act. For the compliance services rendered to the Funds, each Fund pays NLCS a one-time fee plus an annual asset based fee, which scales downward based upon net assets. The Funds also pay NLCS for any out-of-pocket expenses.

DESCRIPTION OF SHARES

Each share of beneficial interest of the Trust has one vote in the election of Trustees. Cumulative voting is not authorized for the Trust. This means that the holders of more than 50% of the shares voting for the election of Trustees can elect 100% of the Trustees if they choose to do so, and, in that event, the holders of the remaining shares will be unable to elect any Trustees.

Shareholders of the Trust and any other future series of the Trust will vote in the aggregate and not by series except as otherwise required by law or when the Board determines that the matter to be voted upon affects only the interest of the shareholders of a particular series or classes. Matters such as election of Trustees are not subject to separate voting requirements and may be acted upon by shareholders of the Trust voting without regard to series.

The Trust's by-laws state that unless the Trust consents in writing to the selection of an alternative forum, the sole and exclusive forums for any Shareholder (including a beneficial owner) to bring (i) any derivative action or proceeding brought on behalf of the Trust; (ii) any action asserting a claim or breach of a fiduciary duty owed by any Trustee, officer or employee, if any, of the Trust to the Trust or the Trust's Shareholders or its beneficial owners; (iii) any action asserting a claim against the Trust, its Trustees, officers or employees, if any, arising pursuant to any provision

of the Delaware Statutory Trust Act or the Trust's Agreement and Declaration of Trust or by-laws; or (iv) any action asserting a claim against the Trust, its Trustees, officers or employees, if any, governed by the internal affairs doctrine shall be a state or federal court located within the State of Delaware. The Trust's by-laws also state that any person or entity that is a shareholder of the Trust shall be deemed to have notice of and consented to the foregoing provisions of the Trust's by-laws.

The Trust is authorized to issue an unlimited number of shares of beneficial interest. Each share has equal, per-class, dividend, distribution and liquidation rights. There are no conversion or preemptive rights applicable to any shares of each Fund. All shares issued are fully paid and non-assessable.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust's Secretary serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Fund's Distributor, and Transfer Agent have established proper anti-money laundering procedures, reported suspicious and/or fraudulent activity and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to "freeze" the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

PURCHASE, REDEMPTION AND PRICING OF SHARES

Calculation of Share Price

As indicated in each Fund's Prospectus under the heading "Determination of Net Asset Value," the NAV of a Fund's shares is determined by dividing the total value of a Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding of such Fund.

Generally, a Fund's domestic securities (including underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges) are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. The Board has appointed the Adviser as its designee (the "Valuation Designee") for all fair value determinations and responsibilities with respect to the Funds, other than overseeing pricing service providers used by any series of the Trust, including the Funds. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Valuation Designee in accordance with procedures approved by the Board and as further described below. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the- counter market.

Certain securities or investments for which daily market quotes are not readily available may be valued, pursuant to guidelines established by the Board, with reference to other securities or indices. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Short-term investments having a maturity of 60 days or less may be generally valued at amortized cost, provided such valuations represent par value.

Exchange-traded options are valued at the last quoted sales price or, in the absence of a sale, at the mean between the current bid and ask prices on the exchange on which such options are traded. Futures and options on futures are valued at the settlement price determined by the exchange. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Valuation Designee. Swap agreements and other derivatives are generally valued based upon quotations from market makers or by a pricing service in accordance with the valuation procedures approved by the Board.

The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Fund shares are not priced, the value of securities held by a Fund can change on days when Fund shares cannot be redeemed or purchased. In the event that a foreign security's market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before a Fund's calculation of NAV), the security will be valued at its fair market value as determined in good faith by a Fund's Valuation Designee in accordance with procedures approved by the Board as discussed below. In addition, because each Fund may invest in underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of these portfolio securities may change on days when you may not be able to buy or sell Fund shares.

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. As a result, the NAV of a Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange is closed and an investor is not able to purchase, redeem or exchange shares

Fund shares are valued at the close of regular trading on the New York Stock Exchange ("NYSE") (normally 4:00 p.m., Eastern time) (the "NYSE Close") on each day that the New York Stock Exchange is open. For purposes of calculating the NAV, each Fund normally use pricing data for domestic equity securities received shortly after the NYSE Close and does not normally take into account trading, clearances or settlements that take place after the NYSE Close. Domestic fixed income and foreign (non-U.S.) securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

When market quotations are insufficient or not readily available, a Fund may value securities at fair value or estimate their value as determined in good faith by the Valuation Designee, pursuant to procedures approved by the Board. Fair valuation may also be used by the Valuation Designee if extraordinary events occur after the close of the relevant market but prior to the NYSE Close.

Notice to Texas Shareholders

Under section 72.1021(a) of the Texas Property Code, initial investors in the Fund who are Texas residents may designate a representative to receive notices of abandoned property in connection with Fund shares. Texas shareholders who wish to appoint a representative should notify the Trust's Transfer Agent by writing to the address below to obtain a form for providing written notice to the Trust:

Creation Units

Each Fund sells and redeems Shares in Creation Units on a continuous basis through the Distributor, without a sales load, at the NAV next determined after receipt of an order in proper form on any Business Day. A "Business Day" is any day on which the NYSE is open for business. As of the date of this SAI, the NYSE observes the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

A Creation Unit is an aggregation of 10,000 Shares. The Board may declare a split or a consolidation in the number of Shares outstanding of the Fund or Trust and make a corresponding change in the number of Shares in a Creation Unit.

Authorized Participants

To purchase or redeem any Creation Units, you must be, or transact through, an Authorized Participant. In order to be an Authorized Participant, you must be either a broker-dealer or other participant ("Participating Party") in the Continuous Net Settlement System ("Clearing Process") of the National Securities Clearing Corporation ("NSCC") or a participant in DTC with access to the DTC system ("DTC Participant"), and you must execute an agreement ("Participant Agreement") with the Distributor that governs transactions in a Fund's Creation Units.

Investors who are not Authorized Participants but want to transact in Creation Units may contact the Distributor for the names of Authorized Participants. An Authorized Participant may require investors to enter into a separate agreement to transact through it for Creation Units and may require orders for purchases of shares placed with it to be in a particular form. Investors transacting through a broker that is not itself an Authorized Participant and therefore must still transact through an Authorized Participant may incur additional charges. There are expected to be a limited number of Authorized Participants at any one time.

Orders must be transmitted by an Authorized Participant by telephone or other transmission method acceptable to the Distributor. Market disruptions and telephone or other communication failures may impede the transmission of orders.

Transaction Fees

A fixed fee payable to the Custodian is imposed on each creation and redemption transaction regardless of the number of Creation Units involved in the transaction ("Fixed Fee"). Purchases and redemptions of Creation Units for cash or involving cash-in-lieu (as defined below) are required to pay an additional variable charge to compensate the Fund and its ongoing shareholders for brokerage and market impact expenses relating to Creation Unit transactions ("Variable Charge," and together with the Fixed Fee, the "Transaction Fees"). With the approval of the Board, the Adviser may waive or adjust the Transaction Fees, including the Fixed Fee and/or Variable Charge (shown in the table below), from time to time. In such cases, the Authorized Participant will reimburse the respective Fund for, among other things, any difference between the market value at which the securities and/or financial instruments were purchased by the Fund and the cash-in-lieu amount, applicable registration fees, brokerage commissions and certain taxes. In addition, purchasers of Creation Units are responsible for the costs of transferring the Deposit Securities to the account of a Fund.

Investors who use the services of a broker, or other such intermediary may be charged a fee for such services. The Transaction Fees for the Funds are listed in the table below.

Fund	Fee for In-Kind and Cash Purchases	Maximum Additional Variable Charge for Cash Purchases*
Premium Growth ETF	$300	2.00%
Premium Dividend ETF	$300	2.00%

*As a percentage of the amount invested.

The Clearing Process

Transactions by an Authorized Participant that is a Participating Party using the NSCC system are referred to as transactions "through the Clearing Process." Transactions by an Authorized Participant that is a DTC Participant using the DTC system are referred to as transactions "outside the Clearing Process." The Clearing Process is an enhanced clearing process that is available only for certain securities and only to DTC participants that are also participants in the Continuous Net Settlement System of the NSCC. In-kind (portions of) purchase orders not subject to the Clearing Process will go through a manual clearing process run by DTC. Portfolio Deposits that include government securities must be delivered through the Federal Reserve Bank wire transfer system ("Federal Reserve System"). Fund Deposits that include cash may be delivered through the Clearing Process or the Federal Reserve System. In-kind deposits of securities for orders outside the Clearing Process must be delivered through the Federal Reserve System (for government securities) or through DTC (for corporate securities).

Foreign Securities

Because the portfolio securities of a Fund may trade on days that the Exchange is closed or are otherwise not Business Days for a Fund, shareholders may not be able to purchase or sell shares of a Fund on the Exchange, on days when the NAV of a Fund could be significantly affected by events in the relevant foreign markets.

Purchasing Creation Units

Portfolio Deposit

The consideration for a Creation Unit generally consists of a specified cash payment (see "Cash Purchase Method" below) or the Deposit Securities and a Cash Component. Together, the Deposit Securities and the Cash Component constitute the "Portfolio Deposit." The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the Deposit Securities. Thus, the Cash Component with respect to a Fund is equal to the difference between (x) the NAV per Creation Unit of a Fund and (y) the market value of the Deposit Securities. If (x) is more than (y), the Authorized Participant will pay the Cash Component to the Fund. If (x) is less than (y), the Authorized Participant will receive the Cash Component from the Fund.

On each Business Day, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the Adviser through the Custodian makes available through NSCC the name and amount of each Deposit Security in the current Portfolio Deposit (based on information at the end of the previous Business Day) for a Fund and the (estimated) Cash Component, effective through and including the previous Business Day, per Creation Unit. The Deposit Securities announced are applicable to purchases of Creation Units until the next announcement of Deposit Securities. Payment of any stamp duty or the like shall be the sole responsibility of the Authorized Participant purchasing a Creation Unit. The Authorized Participant must ensure that all Deposit Securities properly denote change in beneficial ownership.

Custom Orders and Cash-in-lieu

Each Fund may, in its sole discretion, permit or require the substitution of an amount of cash ("cash-in-lieu") to be added to the Cash Component to replace any Deposit Security. A Fund may permit or require cash-in-lieu when, for example, a Deposit Security may not be available in sufficient quantity for delivery or may not be eligible for transfer through the systems of DTC or the Clearing Process. Similarly, a Fund may permit or require cash in lieu of Deposit Securities when, for example, the Authorized Participant or its underlying investor is restricted under U.S. or local securities laws or policies from transacting in one or more Deposit Securities. The Fund will comply with the federal securities laws in accepting Deposit Securities including that the Deposit Securities are sold in transactions that would

be exempt from registration under the Securities Act. All orders involving cash-in-lieu are considered to be "Custom Orders."

Purchase Orders

To order a Creation Unit, an Authorized Participant must submit an irrevocable purchase order to the Distributor.

Timing of Submission of Purchase Orders

An Authorized Participant must submit an irrevocable purchase order no later than the earlier of (i) 2:00 p.m. Eastern Time or (ii) the closing time of the bond markets and/or the trading session on the Exchange, on any Business Day in order to receive that Business Day's NAV ("Cut-off Time"). The Cut-off Time for Custom Orders is generally two hours earlier. The Business Day the order is deemed received by the Distributor is referred to as the "Transmittal Date." An order to create Creation Units is deemed received on a Business Day if (i) such order is received by the Distributor by the Cut-off Time on such day and (ii) all other procedures set forth in the Participant Agreement are properly followed. Persons placing or effectuating custom orders and/or orders involving cash should be mindful of time deadlines imposed by intermediaries, such as DTC and/or the Federal Reserve Bank wire system, which may impact the successful processing of such orders to ensure that cash and securities are transferred by the "Settlement Date," which is generally the Business Day immediately following the Transmittal Date ("T+1") for cash and the second Business Day following the Transmittal Date for securities ("T+2").

Orders Using the Clearing Process

If available, (portions of) orders may be settled through the Clearing Process. In connection with such orders, the Distributor transmits, on behalf of the Authorized Participant, such trade instructions as are necessary to effect the creation order. Pursuant to such trade instructions, the Authorized Participant agrees to deliver the requisite Portfolio Deposit to a Fund, together with such additional information as may be required by the Distributor. Cash Components will be delivered using either the Clearing Process or the Federal Reserve System.

Orders Outside the Clearing Process

If the Clearing Process is not available for (portions of) an order, Portfolio Deposits will be made outside the Clearing Process. Orders outside the Clearing Process must state that the DTC Participant is not using the Clearing Process and that the creation of Creation Units will be effected through DTC. The Portfolio Deposit transfer must be ordered by the DTC Participant on the Transmittal Date in a timely fashion so as to ensure the delivery of Deposit Securities (whether standard or custom) through DTC to a Fund account by 11:00 a.m., Eastern time, on T+1. The Cash Component, along with any cash-in-lieu and Transaction Fee, must be transferred directly to the Custodian through the Federal Reserve System in a timely manner so as to be received by the Custodian no later than 12:00 p.m., Eastern Time, on T+1. If the Custodian does not receive both the Deposit Securities and the cash by the appointed time, the order may be canceled. A canceled order may be resubmitted the following Business Day but must conform to that Business Day's Portfolio Deposit. Authorized Participants that submit a canceled order will be liable to a Fund for any losses incurred by a Fund in connection therewith.

Orders involving foreign Deposit Securities are expected to be settled outside the Clearing Process. Thus, upon receipt of an irrevocable purchase order, the Distributor will notify the Adviser and the Custodian of such order. The Custodian, who will have caused the appropriate local sub-custodian(s) of a Fund to maintain an account into which an Authorized Participant may deliver Deposit Securities (or cash -in-lieu), with adjustments determined by such Fund, will then provide information of the order to such local sub-custodian(s). The ordering Authorized Participant will then deliver the Deposit Securities (and any cash-in-lieu) to a Fund's account at the applicable local sub-custodian.

The Authorized Participant must also make available on or before the contractual settlement date, by means satisfactory to a Fund, immediately available or same day funds in U.S. dollars estimated by the Fund to be sufficient to pay the Cash Component and Transaction Fee. When a relevant local market is closed due to local market holidays, the local market settlement process will not commence until the end of the local holiday period. Settlement must occur by 2:00 p.m., Eastern Time, on the contractual settlement date.

Acceptance of Purchase Order

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by each Fund. Each Fund's determination shall be final and binding.

Each Fund reserves the absolute right to reject or revoke acceptance of a purchase order transmitted to it by the Distributor if (a) the order is not in proper form; (b) the investor(s), upon obtaining the shares ordered, would own 80% or more of the currently outstanding shares of a Fund; (c) the Deposit Securities delivered do not conform to the Deposit Securities for the applicable date; (d) acceptance of the Deposit Securities would have certain adverse tax consequences to a Fund; (e) the acceptance of the Portfolio Deposit would, in the opinion of counsel, be unlawful; (f) the acceptance of the Portfolio Deposit would otherwise, in the discretion of the Trust, Fund or the Adviser, have an adverse effect on the Trust, Fund or the rights of beneficial owners; or (g) in the event that circumstances outside the control of the Trust, the Distributor the Adviser and the Sub-Adviser make it for all practical purposes impossible to process purchase orders. Examples of such circumstances include acts of God; public service or utility problems resulting in telephone, telecopy or computer failures; fires, floods or extreme weather conditions; market conditions or activities causing trading halts; systems failures involving computer or other informational systems affecting the Trust, the Distributor, DTC, NSCC, the Adviser, the Sub-Adviser, each Fund's Custodian, a sub-custodian or any other participant in the creation process; and similar extraordinary events. The Distributor shall notify an Authorized Participant of its rejection of the order. Each Fund, the Custodian, any sub-custodian and the Distributor are under no duty, however, to give notification of any defects or irregularities in the delivery of Portfolio Deposits, and they shall not incur any liability for the failure to give any such notification.

Issuance of a Creation Unit

Once a Fund has accepted an order, upon next determination of such Fund's NAV, the Fund will confirm the issuance of a Creation Unit, against receipt of payment, at such NAV. The Distributor will transmit a confirmation of acceptance to the Authorized Participant that placed the order.

Except as provided below, a Creation Unit will not be issued until a Fund obtains good title to the Deposit Securities and the Cash Component, along with any cash-in-lieu and Transaction Fee. The delivery of Creation Units will generally occur no later than T+2.

In certain cases, Authorized Participants will create and redeem Creation Units on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

With respect to orders involving foreign Deposit Securities, when the applicable local sub-custodian(s) have confirmed to the Custodian that the Deposit Securities (or cash -in-lieu) have been delivered to the Fund's account at the applicable local sub-custodian(s), the Distributor and the Adviser shall be notified of such delivery, and such Fund will issue and cause the delivery of the Creation Unit. While, as stated above, Creation Units are generally delivered on T+2, a Fund may settle Creation Unit transactions on a basis other than T+2 in order to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances.

Each Fund may issue a Creation Unit prior to receiving good title to the Deposit Securities, under the following circumstances. Pursuant to the applicable Participant Agreement, a Fund may issue a Creation Unit notwithstanding that (certain) Deposit Securities have not been delivered, in reliance on an undertaking by the relevant Authorized Participant to deliver the missing Deposit Securities as soon as possible, which undertaking is secured by such Authorized Participant's delivery to and maintenance with the Custodian of collateral having a value equal to at least 115% of the value of the missing Deposit Securities ("Collateral"), as adjusted by time to time by the Adviser. Such Collateral will have a value greater than the NAV of the Creation Unit on the date the order is placed. Such collateral must be delivered no later than 2:00 p.m., Eastern Time, on T+1. The only Collateral that is acceptable to each Fund is cash in U.S. Dollars.

While (certain) Deposit Securities remain undelivered, the Collateral shall at all times have a value equal to at least 115% (as adjusted by the Adviser) of the daily marked-to-market value of the missing Deposit Securities. At any time, a Fund may use the Collateral to purchase the missing securities, and the Authorized Participant will be liable to such Fund for any costs incurred thereby or losses resulting therefrom, whether or not they exceed the amount of the Collateral, including any Transaction Fee, any amount by which the purchase price of the missing Deposit Securities exceeds the market value of such securities on the Transmittal Date, brokerage and other transaction costs. The Trust will return any unused Collateral once all of the missing securities have been received by a Fund. More information regarding each Fund's current procedures for collateralization is available from the Distributor.

Cash Purchase Method

When cash purchases of Creation Units are available or specified for a Fund, they will be effected in essentially the same manner as in-kind purchases In the case of a cash purchase, the investor must pay the cash equivalent of the Portfolio Deposit. In addition, cash purchases will be subject to Transaction Fees, as described above.

Redeeming a Creation Unit

Redemption Basket

The consideration received in connection with the redemption of a Creation Unit generally consists of a specified cash payment (see "Cash Redemption Method" below) or an in-kind basket of designated securities ("Redemption Securities") and a Cash Component. Together, the Redemption Securities and the Cash Component constitute the "Redemption Basket."

There can be no assurance that there will be sufficient liquidity in Shares in the secondary market to permit assembly of a Creation Unit. In addition, investors may incur brokerage and other costs in connection with assembling a Creation Unit.

The Cash Component serves the function of compensating for any differences between the NAV per Creation Unit and the Redemption Securities. Thus, the Cash Component is equal to the difference between (x) the NAV per Creation Unit of a Fund and (y) the market value of the Redemption Securities. If (x) is more than (y), the Authorized Participant will receive the Cash Component from a Fund. If (x) is less than (y), the Authorized Participant will pay the Cash Component to a Fund.

If the Redemption Securities on a Business Day are different from the Deposit Securities, prior to the opening of business on the Exchange (currently 9:30 a.m., Eastern Time), the Adviser through the Custodian makes available through NSCC the name and amount of each Redemption Security in the current Redemption Basket (based on information at the end of the previous Business Day) for a Fund and the (estimated) Cash Component, effective through and including the previous Business Day, per Creation Unit. If the Redemption Securities on a Business Day are different from the Deposit Securities, all redemption requests that day will be processed outside the Clearing Process.

The right of redemption may be suspended or the date of payment postponed: (i) for any period during which the NYSE is closed (other than customary weekend and holiday closings); (ii) for any period during which trading on the NYSE is suspended or restricted; (iii) for any period during which an emergency exists as a result of which disposal of the Shares or determination of the ETF's NAV is not reasonably practicable; or (iv) in such other circumstances as permitted by the SEC, including as described below.

Custom Redemptions and Cash-in-lieu

Each Fund may, in its sole discretion, permit or require the substitution of cash-in-lieu to be added to the Cash Component to replace any Redemption Security. Each Fund may permit or require cash-in-lieu when, for example, a Redemption Security may not be available in sufficient quantity for delivery or may not be eligible for transfer through the systems of DTC or the Clearing Process. Similarly, each Fund may permit or require cash-in-lieu of Redemption Securities when, for example, the Authorized Participant or its underlying investor is restricted under U.S. or local securities law or policies from transacting in one or more Redemption Securities. Each Fund will comply with the

federal securities laws in satisfying redemptions with Redemption Securities, including that the Redemption Securities are sold in transactions that would be exempt from registration under the Securities Act. All redemption requests involving cash-in-lieu are considered to be "Custom Redemptions."

Redemption Requests

To redeem a Creation Unit, an Authorized Participant must submit an irrevocable redemption request to the Distributor.

An Authorized Participant submitting a redemption request is deemed to represent to the Fund that it has ascertained or has reasonable grounds to believe that as of the time of the contractual settlement date, that (i) it or its customer, as the case may be, owns, will own or have the authority and right to tender for redemption the Creation Unit to be redeemed and can receive the entire proceeds of the redemption, and (ii) all of the Shares that are in the Creation Unit to be redeemed have not been borrowed, loaned or pledged to another party nor are they the subject of a repurchase agreement, securities lending agreement or such other arrangement that would preclude the delivery of such Shares to a Fund on the contractual settlement date. Each Fund reserves the absolute right, in its sole discretion, to verify these representations, but will typically require verification in connection with higher levels of redemption activity and/or short interest in a Fund. If the Authorized Participant, upon receipt of a verification request, does not provide sufficient verification of the requested representations, the redemption request will not be considered to be in proper form and may be rejected by a Fund.

Timing of Submission of Redemption Requests

An Authorized Participant must submit an irrevocable redemption order no later than the Cut-off Time. The Cut-off Time for Custom Orders is generally two hours earlier. The Business Day the order is deemed received by the Distributor is referred to as the "Transmittal Date." A redemption request is deemed received if (i) such order is received by the Distributor by the Cut-off Time on such day and (ii) all other procedures set forth in the Participant Agreement are properly followed. Persons placing or effectuating Custom Redemptions and/or orders involving cash should be mindful of time deadlines imposed by intermediaries, such as DTC and/or the Federal Reserve System, which may impact the successful processing of such orders to ensure that cash and securities are transferred by the Settlement Date, as defined above.

Requests Using the Clearing Process

If available, (portions of) redemption requests may be settled through the Clearing Process. In connection with such orders, the Distributor transmits on behalf of the Authorized Participant, such trade instructions as are necessary to effect the redemption. Pursuant to such trade instructions, the Authorized Participant agrees to deliver the requisite Creation Unit(s) to a Fund, together with such additional information as may be required by the Distributor. Cash Components will be delivered using either the Clearing Process or the Federal Reserve System, as described above.

Requests Outside the Clearing Process

If the Clearing Process is not available for (portions of) an order, Redemption Baskets will be delivered outside the Clearing Process. Orders outside the Clearing Process must state that the DTC Participant is not using the Clearing Process and that the redemption will be effected through DTC. The Authorized Participant must transfer or cause to be transferred the Creation Unit(s) of shares being redeemed through the book-entry system of DTC so as to be delivered through DTC to the Custodian by 10:00 a.m., Eastern Time, on received T+1. In addition, the Cash Component must be received by the Custodian by 12:00 p.m., Eastern Time, on T+1. If the Custodian does not receive the Creation Unit(s) and Cash Component by the appointed times on T+1, the redemption will be rejected, except in the circumstances described below. A rejected redemption request may be resubmitted the following Business Day.

Orders involving foreign Redemption Securities are expected to be settled outside the Clearing Process. Thus, upon receipt of an irrevocable redemption request, the Distributor will notify the Adviser and the Custodian. The Custodian will then provide information of the redemption to each Fund's local sub-custodian(s). The redeeming Authorized Participant, or the investor on whose behalf is acting, will have established appropriate arrangements with a broker-

dealer, bank or other custody provider in each jurisdiction in which the Redemption Securities are customarily traded and to which such Redemption Securities (and any cash-in-lieu) can be delivered from a Fund's accounts at the applicable local sub-custodian(s).

Acceptance of Redemption Requests

All questions as to the number of shares of each security in the Deposit Securities and the validity, form, eligibility and acceptance for deposit of any securities to be delivered shall be determined by the Trust. The Trust's determination shall be final and binding.

Delivery of Redemption Basket

Once a Fund has accepted a redemption request, upon next determination of such Fund's NAV, the Fund will confirm the issuance of a Redemption Basket, against receipt of the Creation Unit(s) at such NAV, any cash-in-lieu and Transaction Fee. A Creation Unit tendered for redemption and the payment of the Cash Component, any cash-in-lieu and Transaction Fee will be effected through DTC. The Authorized Participant, or the investor on whose behalf it is acting, will be recorded on the book-entry system of DTC.

The Redemption Basket will generally be delivered to the redeeming Authorized Participant within T+2. Except under the circumstances described below, however, a Redemption Basket generally will not be issued until the Creation Unit(s) are delivered to a Fund, along with the Cash Component, any cash-in-lieu and Transaction Fee.

In certain cases, Authorized Participants will create and redeem Creation Units on the same trade date. In these instances, the Trust reserves the right to settle these transactions on a net basis.

With respect to orders involving foreign Redemption Securities, a Fund may settle Creation Unit transactions on a basis other than T+2 in order to accommodate foreign market holiday schedules, to account for different treatment among foreign and U.S. markets of dividend record dates and ex-dividend dates (that is the last day the holder of a security can sell the security and still receive dividends payable on the security), and in certain other circumstances. When a relevant local market is closed due to local market holidays, the local market settlement process will not commence until the end of the local holiday period. If a Fund includes a foreign investment in its basket, and if a local market holiday, or series of consecutive holidays, or the extended delivery cycles for transferring foreign investments to redeeming Authorized Participants prevents timely delivery of the foreign investment in response to a redemption request, such Fund may delay delivery of the foreign investment more than seven days if the Fund delivers the foreign investment as soon as practicable, but in no event later than 15 days.

Cash Redemption Method

When cash redemptions of Creation Units are available or specified for the Fund, they will be effected in essentially the same manner as in-kind redemptions. In the case of a cash redemption, the investor will receive the cash equivalent of the Redemption Basket minus any Transaction Fees, as described above.

TAX STATUS

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. If an entity or arrangement treated as a partnership for U.S. federal income tax purposes holds shares of a Fund, the U.S. federal income tax treatment of a partner in such partnership generally will depend upon the status of the partner and activities of the partnership. All shareholders (and partners in a partnership that is a shareholder) should consult a qualified tax adviser regarding their investment in a Fund.

Each Fund intends to elect to be treated and qualify to be treated as a regulated investment company under Subchapter M of the Internal Revenue Code, and intends to continue to so qualify, which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders, as described more fully below. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, a Fund should not be subject to federal income or excise tax on its investment company taxable income or net capital gain, which are

distributed to shareholders in accordance with the applicable timing requirements. Investment company taxable income and net capital gain of a Fund will be computed in accordance with Section 852 of the Internal Revenue Code.

Investment company taxable income is made up of dividends and interest less expenses, plus any excess of net short-term capital gains over net long-term capital losses. Net capital gain (that is, the excess of net long-term capital gains over net-short-term capital losses) for a fiscal year is computed by taking into account any capital loss carryforward of a Fund. Capital losses may be carried forward indefinitely and retain the character of the original loss. Capital loss carry forwards are available to offset future realized capital gains. To the extent that these carry forwards are used to offset future capital gains it is probable that the amount offset will not be distributed to shareholders.

To be treated as a regulated investment company under Subchapter M of the Internal Revenue Code, each Fund must, among other things, (a) derive at least 90% of its gross income from dividends, interest, payments with respect to certain securities loans, gains from the sale or other disposition of stocks, securities or foreign currencies, or other income (including gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and net income from "qualified publicly traded partnerships" (as defined in Section 851(h) of the Internal Revenue Code), and (b) diversify its holdings so that, at the end of each quarter, (i) at least 50% of the value of the Fund's total assets is represented by cash and cash items, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the value of the Fund's total assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of the Fund's total assets is invested in the securities (other than U.S. government securities or the securities of other regulated investment companies) of any one issuer, two or more issuers that the Fund controls and that are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships. If a Fund qualifies as a regulated investment company and distributes to its shareholders each taxable year an amount equal to or exceeding the sum of (i) 90% of its investment company taxable income without regard to the deduction for dividends paid and (ii) 90% of the excess of its gross tax-exempt interest, if any, over certain disallowed deductions, the Fund generally will not be subject to U.S. federal income tax on any income of the Fund, including net capital gain, distributed to shareholders. If, however, a Fund meets such distribution requirements, but chooses to retain a portion of its investment company taxable income or net capital gain, it generally will be subject to U.S. federal income tax at regular corporate rates on the amount retained.

Each Fund intends to distribute all of its investment company taxable income and any net capital gains in accordance with the timing requirements imposed by the Internal Revenue Code and therefore should not be required to pay any federal income or excise taxes. Distributions of investment company taxable income and net capital gain will be made after the end of each year ending October 31, and no later than December 31 of each year. Both types of distributions will be in shares of the applicable Fund unless a shareholder elects to receive cash.

If a Fund fails to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such that Fund would be required to pay income taxes on its investment company taxable income and net capital gains, if any, at the rates generally applicable to corporations (currently, at a maximum rate of 21% plus state and local taxes, if any). Shareholders of such Fund generally would not be liable for income tax on the Fund's investment company taxable income or net capital gains in their individual capacities. Distributions to shareholders, whether from the Fund's investment company taxable income or net capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of that Fund. Distributions by the Fund in excess of the Fund's current and accumulated earnings and profits will be treated as a return of capital to the extent of (and in reduction of) a shareholder's tax basis in his or her Fund shares and any such amount in excess of that basis will be treated as gain from the sale of shares, as discussed below.

Each Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Internal Revenue Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of a Fund's ordinary income for the calendar year and at least 98.2% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to such Fund during the preceding calendar year. Under ordinary circumstances, each Fund expects to time its distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Internal Revenue Code.

Distributions of investment company taxable income are taxable to shareholders as ordinary income.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as long-term capital gain; regardless of the length of time the shares of the Fund have been held by such shareholders.

A Fund may be able to report a portion of its income as "qualified dividend income," which, if certain conditions, including holding period requirements, are met by the Fund and the shareholders, is taxable to noncorporate shareholders at rates of up to 20%. In general, dividends may be reported by a Fund as qualified dividend income if they are attributable to qualified dividend income received by the Fund. Qualified dividend income is, in general, dividend income from U.S. corporations and certain foreign corporations (i.e., certain foreign corporations incorporated in a possession of the U.S. or in certain countries with a comprehensive tax treaty with the U.S., and certain other foreign corporations if the stock with respect to which the dividend is paid is readily tradable on an established securities market in the U.S.). Passive foreign investment companies are not qualified foreign corporations for this purpose, and dividends received by a Fund from REITs generally are not expected to qualify for treatment as qualified dividend income.

Under the Tax Cuts and Jobs Act, "qualified REIT dividends" (i.e., ordinary REIT dividends other than capital gain dividends and portions of REIT dividends designated as qualified dividend income eligible for capital gain tax rates) are eligible for a 20% deduction by individuals and other non-corporate taxpayers. This deduction, if allowed in full, equates to a maximum effective tax rate of 29.6% (37% top rate applied to income after 20% deduction). The Treasury regulations allow a regulated investment company (such as a Fund) to pay and report "Section 199A dividends" to its shareholders with respect to the regulated investment company's qualified REIT dividends. Under the regulations, the amount of Section 199A dividends that a Fund may pay and report to its shareholders is limited to the excess of the "qualified REIT dividends" that the Fund receives from REITs for a taxable year over the Fund's expenses allocable to such dividends. A shareholder may treat Section 199A dividends received with respect to a share of a Fund as "qualified REIT dividends" if the shareholder has held the share for more than 45 days during the 91-day period beginning 45 days before the date on which the share becomes ex-dividend, but only to the extent that the shareholder is not under an obligation (under a short-sale or otherwise) to make related payments with respect to positions in substantially similar or related property. A shareholder may include 20% of the shareholder's "qualified REIT dividends" in the computation of the shareholder's "combined qualified business income amount" under Section 199A of the Internal Revenue Code. Section 199A of the Internal Revenue Code allows a taxpayer (other than a corporation) a deduction for a taxable year equal to the lesser of (A) the taxpayer's "combined qualified business income amount" or (B) 20% of the excess of the taxpayer's taxable income over the taxpayer's net capital gain for the year.

Certain U.S. shareholders, including individuals and estates and trusts, are subject to an additional 3.8% Medicare tax on all or a portion of their "net investment income," which should include dividends from a Fund and net gains from the disposition of shares of a Fund. U.S. shareholders are urged to consult their own tax advisors regarding the implications of the additional Medicare tax resulting from an investment in a Fund.

Redemption of Fund shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of investment company taxable income and net capital gain will be taxable as described above, whether received in cash or additional shares. Shareholders electing to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the NAV of a share on the reinvestment date.

All distributions of investment company taxable income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Each Fund (or its administrative agent) is required to report to the IRS and furnish to shareholders the cost basis information for sale transactions of shares. Shareholders may elect to have one of several cost basis methods applied to their account when calculating the cost basis of shares sold, including average cost, FIFO or some other specific identification method. Unless you instruct otherwise, each Fund will use average cost as its default cost basis method. If average cost is used for the first sale of shares covered by these rules, the shareholder may only use an alternative cost basis method for shares purchased prospectively. Shareholders should consult with their tax advisors to determine the best cost basis method for their tax situation. Shareholders that hold their shares through a financial intermediary should contact such financial intermediary with respect to reporting of cost basis and available elections for their accounts.

Under the Internal Revenue Code, each Fund will be required to report to the Internal Revenue Service ("IRS") all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Internal Revenue Code, distributions of investment company taxable income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax (currently, at a rate of 24%) in the case of non-exempt shareholders who fail to furnish a Fund with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if a Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Foreign (Non-U.S.) Shareholders

The foregoing discussion relates only to U.S. federal income tax law as applicable to U.S. persons (*i.e.*, U.S. citizens and residents and domestic corporations, trusts and estates). Shareholders who are not U.S. persons should consult their tax advisers regarding U.S. and foreign (non-U.S.) tax consequences of ownership of shares of a Fund, including the likelihood that distributions to them would be subject to withholding of U.S. federal income tax at a rate of 30% (or at a lower rate under a tax treaty) and the possibility they may be subject to U.S. estate tax. A portion of a Fund's distributions received by a foreign (non-U.S.) shareholder may, however, be exempt from U.S. withholding tax to the extent properly reported by such Fund as attributable to U.S. source interest income and short-term capital gains. If a foreign (non-U.S.) shareholder is eligible for a reduced rate of withholding tax under an applicable tax treaty, the foreign (non-U.S.) shareholder will be required to provide an applicable IRS Form W-8 certifying its entitlement to benefits under the treaty in order to obtain a reduced rate of withholding tax. However, if the distributions are effectively connected with a U.S. trade or business of the foreign (non-U.S.) shareholder (or, if an income tax treaty applies, attributable to a permanent establishment in the United States of the foreign (non-U.S.) shareholder), then the distributions will be subject to U.S. federal income tax at the rates applicable to U.S. persons, plus, in certain cases where the foreign (non-U.S.) shareholder is a corporation, a branch profits tax at a 30% rate (or lower rate provided in an applicable treaty). If the foreign (non-U.S.) shareholder is subject to such U.S. income tax on a distribution, then a Fund is not required to withhold U.S. federal tax if the foreign (non-U.S.) shareholder complies with applicable certification and disclosure requirements.

Ordinary dividends (including qualified dividend income) paid to a foreign (non-U.S.) shareholder that fails to make certain required certifications, or that is a "foreign financial institution" as defined in Section 1471 of the Internal Revenue Code and that does not meet the requirements imposed on foreign financial institutions by Section 1471, are generally subject to a U.S. withholding tax at a 30% rate. A foreign (non-U.S.) shareholder may be exempt from the withholding described in this paragraph under an intergovernmental agreement between the U.S. and a foreign government, provided that the shareholder and the applicable foreign government comply with the terms of such agreement. While withholding described in this paragraph would have applied also to payments of gross proceeds

from the sale or other disposition of shares on or after January 1, 2019, proposed Treasury regulations eliminate such withholding on payments of gross proceeds entirely. Taxpayers generally may rely on these proposed Treasury regulations until final Treasury regulations are issued.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for the Fund, the Fund's transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, certain of the Fund's hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Fund's book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of (and in reduction of) the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Fund's book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by a Fund in certain "passive foreign investment companies" ("PFICs") could subject such Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to such Fund's shareholders. However, a Fund may elect to treat a PFIC as a "qualified electing fund" ("QEF"), in which case such Fund will be required to include its share of the company's income and net capital gains annually, regardless of whether it receives any distribution from the company.

A Fund also may make an election to "mark to market" the gains (and to a limited extent losses) in such holdings as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for the applicable Fund to avoid taxation. Making either of these elections, therefore, may require a Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return.

Foreign Taxation

Income received by a Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of a Fund's total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to "pass through" to the Fund's shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by a Fund, and may be entitled to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of each Fund's taxable year whether the foreign taxes paid by the Fund will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of a Fund's income will flow through to shareholders of the Fund. With respect to each Fund, gains from the sale of securities will be treated as derived from U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by each Fund.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income, which is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. A Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by a Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, a Fund will be required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

If a Fund holds the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the applicable Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). A Fund may realize gains or losses from such liquidations. In the event a Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Treatment of the Options

A Fund's investments in offsetting positions with respect to the S&P 500 Index may be "straddles" for U.S. federal income tax purposes. The straddle rules may affect the character of gains (or losses) realized by a Fund, and losses realized by a Fund on positions that are part of a straddle may be deferred under the straddle rules, rather than being taken into account in calculating taxable income for the taxable year in which the losses are realized. In addition, certain carrying charges (including interest expense) associated with positions in a straddle may be required to be capitalized rather than deducted currently. Certain elections that a Fund may make with respect to its straddle positions may also affect the amount, character and timing of the recognition of gains or losses from the affected positions.

The tax consequences of straddle transactions to a Fund are not entirely clear in all situations under currently available authority. The straddle rules may increase the amount of short-term capital gain realized by a Fund, which is taxed as ordinary income when distributed to U.S. shareholders in a non-liquidating distribution. Because application of the straddle rules may affect the character of gains or losses, defer losses and/or accelerate the recognition of gains or losses from the affected straddle positions, if a Fund makes a non-liquidating distribution of its short-term capital gain, the amount which must be distributed to U.S. shareholders as ordinary income may be increased or decreased substantially as compared to a fund that did not engage in such transactions.

In general, the straddle rules described above do not apply if all the offsetting positions making up a straddle consist of one or more "qualified covered call options" and the stock to be purchased under the options and the straddle is not part of a larger straddle. A qualified covered call option is generally any option granted by a Fund to purchase stock it holds (or stock it acquires in connection with granting the option) if, among other things, (1) the option is traded on a national securities exchange that is registered with the SEC or other market the IRS determined has rules adequate to carry out the purposes of the applicable Code provision, (2) the option is granted more than 30 days before it expires, (3) the option is not a "deep-in-the-money option," (4) such option is not granted by an options dealer in connection with his activity of dealing in options, and (5) gain or loss with respect to the option is not ordinary income or loss.

To the extent a Fund writes options on Underlying Funds, the amount of the premium received by the Fund for writing such options will generally be entirely short-term capital gain to the Fund. In addition, if such an option is closed by a Fund, any gain or loss realized by the Fund as a result of closing the transaction will also generally be short-term capital gain or loss. If such an option is exercised any gain or loss realized by a Fund upon the sale of the underlying security pursuant to such exercise will generally be short-term or long-term capital gain or loss to the Fund depending on the Fund's holding period for the underlying security.

Distributions that the Funds receive from an underlying fund will be treated as qualified dividend income only to the extent so reported by such underlying fund. Certain of the Funds' investment strategies may limit their ability to make distributions eligible to be treated as qualified dividend income. Certain Funds' investment strategies may limit their ability to make distributions eligible for the dividends received deduction for corporate shareholders.

Shareholders of a Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Fund's shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year each Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisors about the application of federal, state, and local and foreign tax law in light of their particular situation.

INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Deloitte & Touche LLP, located at 695 Town Center Drive, Ste. 1000, Costa Mesa, CA 92626, serves as the Funds' independent registered public accounting firm. The firm provides services including (i) audit of annual financial statements, (ii) assistance and consultation in connection with SEC filings, and (iii) other audit related and tax services.

LEGAL COUNSEL

Blank Rome LLP, located at 1271 Avenue of the Americas, New York, NY 10020, serves as the Trust's legal counsel.

FINANCIAL STATEMENTS

Because the Funds have not commenced operations, there are no financial statements available at this time. Shareholders of each Fund will be informed of the Fund's progress through periodic reports when those reports become available. Financial statements certified by the Funds' independent registered public accounting firm will be submitted to shareholders at least annually.

APPENDIX A
Adviser Proxy Voting Policies and Procedures

CAPITAL WEALTH PLANNING, LLC
PROXY VOTING POLICIES AND PROCEDURES

Effective Date: September 10, 2026

The following are proxy voting policies and procedures ("Policies and Procedures") adopted by Capital Wealth Planning, LLC ("CWP"), an investment adviser registered with the U.S. Securities and Exchange Commission ("SEC") under the Investment Advisers Act of 1940, as amended ("Advisers Act"), with respect to voting securities held by client portfolios. These Policies and Procedures are adopted to ensure compliance by CWP with Rule 206(4)-6 under the Advisers Act and other applicable fiduciary obligations under the rules and regulations of the SEC and interpretations of its staff. As required under the Advisers Act and other applicable laws, CWP follows these Policies and Procedures for each of its clients that have directed CWP in writing to vote that client's proxies.

1.0 Statement of Principle

1.1 Where CWP is contractually given responsibility for voting proxies, CWP must take reasonable steps under the circumstances to ensure that proxies are received and voted with a view to enhancing the value of the shares of stock held in such client accounts.

1.2 Definitions

1.2.1 Best Interest of Clients - This means, in the view of CWP, clients' best economic interest over the long term — that is, the common interest that all clients share in seeing the value of a common investment increase over time. Clients may have differing political or social interests, but their best economic interest is generally uniform.

1.2.2 Material Conflict of Interest - This means when there are circumstances that CWP, or any member of its senior management or any of its portfolio managers or portfolio analysts, knowingly does business with a particular proxy issuer or closely affiliated entity which may appear to create a material conflict between the interests of CWP and the interests of its clients in how proxies of that issuer are voted.

2.0 Proxy Voting Procedures

2.1 The Adviser's Chief Compliance Officer shall act as the "Proxy Manager".

2.2 The Proxy Manager shall identify those client accounts that CWP is responsible for voting proxies by reviewing the following documents: The client's investment advisory or sub-advisory agreement; The client's new account documents; and The client's file to determine if there are any separate agreements authorizing CWP to vote the client's proxies.

2.3 Unless the power to vote proxies for a client is reserved to that client (or in the case of an employee benefit plan, the plan's trustee or other fiduciary), CWP shall be responsible for voting the proxies related to that account.

3.0 Third-Party Service Provider

3.1 CWP has determined that it would be in the best interest of its clients and for the avoidance of any material conflicts of interest for CWP to engage the services of a third-party service provider to provide research and guidelines for CWP to vote proxies.

3.2 Initial Selection of Third-Party Service Provider

3.2.1 The Proxy Manager shall be responsible for selecting the appropriate third-party service provider.

3.3 Review of Third-Party Service Provider

3.3.1 The Proxy Manager shall be responsible for reviewing the performance of the third-party service provider on at least an annual basis to ensure that CWP's proxy voting is in accordance with the best interest of CWP's clients.

4.0 Proxy Administrator

4.1 Once a client account is established and the proxy voting responsibility is determined, the Proxy Administrator, is responsible for receiving and processing proxies for securities held in the portfolios of CWP clients and ensuring that votes are cast. CWP engages a third-party service provider, Broadridge, as its Proxy Administrator.

4.2 The Proxy Administrator is responsible for ensuring that the registered owners of record, e.g. the client, trustee or custodian bank, that receive proxy materials from the issuer or its information agent, forward proxy materials to the Proxy Administrator. Proxies may also be delivered electronically through a proxy service. The Proxy Administrator logs in any proxy materials received, matches them to the securities to be voted and confirms that the correct number of shares, as of the record date, is reflected on the proxy.

4.3 The Proxy Administrator also compiles and maintains information, for each client for which CWP votes proxies, showing the issuer's name, meeting date and manner in which it voted on each proxy proposal. The Proxy Administrator is also responsible for monitoring compliance with client proxy voting policies. A copy of each proxy statement is kept.

5.0 Voting Policies

5.1 General Voting Policy

5.1.1 The financial interest of CWP's clients is the primary consideration in determining how proxies should be voted. In the case of social and political responsibility issues that in our view do not primarily involve financial considerations, the diversity of our clients means that we are unable to represent each such view in each instance. Thus, CWP exercises its vote on these issues in what it believes to be the best financial interests of its clients.

5.2 Specific Voting Policies

5.2.1 When making specific proxy decisions, CWP generally adheres to the Broadridge Shareholder Value Template guidelines ("Guidelines"). The Proxy Manager is responsible for ensuring the voting of all proxies is performed in a timely manner and for monitoring the effectiveness of the Guidelines.

5.3 Conflicts of Interest

5.3.1 When a specific proxy decision presents a conflict of interest between CWP and the client, CWP will adopt mirror voting as appropriate, voting in line with the recommendation of the proxy administrator.

6.0 Documentation, Recordkeeping and Reporting Requirements

6.1 Documentation

6.1.1 The Proxy Manager shall be responsible for: Implementing and updating these Policies and Procedures; Overseeing the proxy voting process; and Maintaining proxy voting records.

7.0 Recordkeeping

7.1 The Proxy Manager shall ensure that CWP (via the Proxy Administrator) maintains records of all proxies voted.

7.2 Clients may request a copy of the manner in which proxies were voted regarding their account upon oral or written request to the Proxy Manager. The Proxy Manager will maintain documentation of any such request.

8.0 Review

8.1 Periodically, but no less than annually, the Proxy Manager will review accounts to verify that:

- Proxies are being properly received;
- Each proxy received has been voted in a manner consistent with these Proxy Voting Policies and Procedures and the Guidelines;
- Records of proxy voting have been properly maintained.

9.0 Form ADV 2A Disclosure

9.1 The Chief Compliance Officer is responsible for making sure that CWP's Form ADV Part 2A

contains a concise summary of CWP's Proxy Voting Policy and how clients may obtain a copy of its policy and/or record of its votes.

10.0 Form N-PX

10.1 The Chief Compliance Officer is responsible for collecting the information necessary and filing of form N-PX with the SEC by August 31st for the 12-month period ending June 30.

APPENDIX B

DESCRIPTION OF SECURITIES RATINGS

The ratings of Moody's Investors Service, Inc. ("Moody's"), Standard & Poor's Ratings Services ("S&P Global Ratings"), Fitch Ratings ("Fitch"), and DBRS® Ratings Limited ("DBRS") represent their respective opinions as of the date they are expressed and not statements of fact as to the quality of various long-term and short-term debt instruments they undertake to rate. It should be emphasized that ratings are general and are not absolute standards of quality. Consequently, debt instruments with the same maturity, coupon and rating may have different yields while debt instruments of the same maturity and coupon with different ratings may have the same yield. Ratings do not constitute recommendations to buy, sell, or hold any security, nor do they comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of any payments of any security.

Short-Term Credit Ratings

Short-term issue credit ratings are generally assigned to those obligations considered short-term in the relevant market, typically with an original maturity of no more than 365 days. Short-term issue credit ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. An ***S&P Global Ratings*** short-term issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation. However, the ratings S&P assigns to certain instruments may diverge from these guidelines based on market practices. The following summarizes the rating categories used by S&P Global Ratings for short-term issues:

"A-1" –Obligations rated "A-1" are rated in the highest category by S&P Global Ratings. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

"A-2" – Obligations rated "A-2" are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

"A-3" – Obligations rated "A-3" exhibit adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

"B" – Obligations rated "B" are regarded as vulnerable and have significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor's inadequate capacity to meet its financial commitments.

"C" –Obligations rated "C" are currently vulnerable to nonpayment and are dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

"D" –Obligations rated "D" are in default or in breach of an imputed promise. For non-hybrid capital instruments, the "D" rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The "D" rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to "D" if it is subject to a distressed debt restructuring.

Local Currency and Foreign Currency Ratings – S&P Global Ratings' issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. An issuer's foreign currency rating will differ from its local currency rating when the obligor has a different capacity to meet its obligations denominated in its local currency, vs. obligations denominated in a foreign currency.

Moody's Investors Service ("Moody's") short-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of thirteen months or less and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default.

Moody's employs the following designations to indicate the relative repayment ability of rated issuers:

"P-1" –Ratings of Prime-1 reflect a superior ability to repay short-term debt obligations.

"P-2" –Ratings of Prime-2 reflect a strong ability to repay short-term debt obligations.

"P-3" – Ratings of Prime-3 reflect an acceptable ability to repay short-term obligations.

"NP" – Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Fitch, Inc. / Fitch Ratings Ltd. ("Fitch") short-term issuer or obligation ratings are based in all cases on the short-term vulnerability to default of the rated entity and relates to the capacity to meet financial obligations in accordance with the documentation governing the relevant obligation. Short-term deposit ratings may be adjusted for loss severity. Short-term ratings are assigned to obligations whose initial maturity is viewed as "short-term" based on market convention. Typically, this means up to 13 months for corporate, sovereign, and structured obligations and up to 36 months for obligations in U.S. public finance markets. The following summarizes the rating categories used by Fitch for short-term obligations:

"F1" – Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

"F2" – Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

"F3" – Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

"B" – Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

"C" – High short-term default risk. Default is a real possibility.

"RD" – Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically applicable to entity ratings only.

"D" – Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

"NR" – This designation indicates that Fitch does not publicly rate the associated issuer or issue.

"WD" – This designation indicates that the rating has been withdrawn and is no longer maintained by Fitch.

DBRS® Ratings Limited ("DBRS") short-term debt rating scale provides an opinion on the risk that an issuer will not meet its short-term financial obligations in a timely manner. Ratings are based on quantitative and qualitative considerations relevant to the issuer and the relative ranking of claims. The "R-1" and "R-2" rating categories are further denoted by the sub-categories "(high)", "(middle)", and "(low)".

The following summarizes the ratings used by DBRS for commercial paper and short-term debt:

"R-1 (high)" - Short-term debt rated "R-1 (high)" is of the highest credit quality. The capacity for the payment of short-term financial obligations as they fall due is exceptionally high. Unlikely to be adversely affected by future events.

"R-1 (middle)" – Short-term debt rated "R-1 (middle)" is of superior credit quality. The capacity for the payment of short-term financial obligations as they fall due is very high. Differs from "R-1 (high)" by a relatively modest degree. Unlikely to be significantly vulnerable to future events.

"R-1 (low)" – Short-term debt rated "R-1 (low)" is of good credit quality. The capacity for the payment of short-term financial obligations as they fall due is substantial. Overall strength is not as favorable as higher rating categories. May be vulnerable to future events, but qualifying negative factors are considered manageable.

"R-2 (high)" – Short-term debt rated "R-2 (high)" is considered to be at the upper end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events.

"R-2 (middle)" – Short-term debt rated "R-2 (middle)" is considered to be of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events or may be exposed to other factors that could reduce credit quality.

"R-2 (low)" – Short-term debt rated "R-2 (low)" is considered to be at the lower end of adequate credit quality. The capacity for the payment of short-term financial obligations as they fall due is acceptable. May be vulnerable to future events. A number of challenges are present that could affect the issuer's ability to meet such obligations.

"R-3" – Short-term debt rated "R-3" is considered to be at the lowest end of adequate credit quality. There is a capacity for the payment of short-term financial obligations as they fall due. May be vulnerable to future events and the certainty of meeting such obligations could be impacted by a variety of developments.

"R-4" – Short-term debt rated "R-4" is considered to be of speculative credit quality. The capacity for the payment of short-term financial obligations as they fall due is uncertain.

"R-5" – Short-term debt rated "R-5" is considered to be of highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet short-term financial obligations as they fall due.

"D" – Short-term debt rated "D" is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to "D" may occur. DBRS may also use "SD" (Selective Default) in cases where only some securities are impacted, such as the case of a "distressed exchange".

Long-Term Credit Ratings

S&P Global Ratings would typically assign a long-term issue credit rating to an obligation with an original maturity of greater than 365 days. However, the ratings S&P assigns to certain instruments may diverge from these guidelines based on market practices. The following summarizes the ratings used by S&P Global Ratings for long-term issues:

"AAA" – Obligations rated "AAA" have the highest rating assigned by S&P Global Ratings. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

"AA" – Obligations rated "AA" differ from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

"A" – Obligations rated "A" are somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

"BBB" – Obligations rated "BBB" exhibit adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitment on the obligation.

"BB," "B," "CCC," "CC" and "C" – Obligations rated "BB," "B," "CCC," "CC" and "C" are regarded as having significant speculative characteristics. "BB" indicates the least degree of speculation and "C" the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

"BB" – Obligations rated "BB" are less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

"B" – Obligations rated "B" are more vulnerable to nonpayment than obligations rated "BB", but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitments on the obligation.

"CCC" – Obligations rated "CCC" are currently vulnerable to nonpayment and are dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

"CC" – Obligations rated "CC" is currently highly vulnerable to nonpayment. The "CC" rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

"C" – Obligations rated "C" is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

"D" – Obligations rated "D" is in default or in breach of an imputed promise. For non-hybrid capital instruments, the "D" rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The "D" rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to "D" if it is subject to a distressed exchange offer.

"NR" – This indicates that a rating has not been assigned or is no longer assigned..

Plus (+) or minus (-) – The ratings from "AA" to "CCC" may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

Local Currency and Foreign Currency Ratings - S&P Global Ratings' issuer credit ratings make a distinction between foreign currency ratings and local currency ratings. An issuer's foreign currency rating will differ from its local currency rating when the obligor has a different capacity to meet its obligations denominated in its local currency, vs. obligations denominated in a foreign currency.

Moody's long-term ratings are forward-looking opinions of the relative credit risks of financial obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default. The following summarizes the ratings used by Moody's for long-term debt:

"Aaa" – Obligations rated "Aaa" are judged to be of the highest quality, subject to the lowest level of credit risk.

"Aa" – Obligations rated "Aa" are judged to be of high quality and are subject to very low credit risk.

"A" – Obligations rated "A" are judged to be upper-medium grade and are subject to low credit risk.

"Baa" – Obligations rated "Baa" are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

"Ba" – Obligations rated "Ba" are judged to be speculative and are subject to substantial credit risk.

"B" – Obligations rated "B" are considered speculative and are subject to high credit risk.

"Caa" – Obligations rated "Caa" are judged to be speculative of poor standing and are subject to very high credit risk.

"Ca" – Obligations rated "Ca" are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

"C" – Obligations rated "C" are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from "Aa" through "Caa." The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.*

* By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

The following summarizes long-term ratings used by ***Fitch***:

"AAA" – Securities considered to be of the highest credit quality. "AAA" ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

"AA" – Securities considered to be of very high credit quality. "AA" ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

"A" – Securities considered to be of high credit quality. "A" ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

"BBB" – Securities considered to be of good credit quality. "BBB" ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate, but adverse business or economic conditions are more likely to impair this capacity.

"BB" – Securities considered to be speculative. "BB" ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

"B" – Securities considered to be highly speculative. "B" ratings indicate that material credit risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

"CCC" – A "CCC" rating indicates that substantial credit risk is present. Very low margin for safety. Default is a real possibility.

"CC" – A "CC" rating indicates very high levels of credit risk. Default of some kind appears probable.

"C" – A "C" rating indicates exceptionally high levels of credit risk. A default or default-like process has begun, or for a closed funding vehicle, payment capacity is irrevocably impaired. Conditions that are indicative of a C category rating for an issuer include:

a. the issuer has entered into a grace or cure period following non-payment of a material financial obligation;
b. the formal announcement by the issuer or their agent of a distressed debt exchange;
c. closed financing vehicle where payment capacity is irrevocably impaired such that it is not expected to pay interest and/or principal in full during the life of the transaction, but where no payment default is imminent.

"RD" – Restricted default. RD ratings indicate an issuer that in Fitch's opinion has experienced an uncured payment default on a bond, loan or other material financial obligation but which has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, and which has not otherwise ceased operating. This would include: a. the selective payment default on a specific class or currency of debt; b. the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation.

"D" – Default. D ratings indicate an issuer that in Fitch's opinion has entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure, or which has otherwise ceased business and debt is still outstanding.

Defaulted obligations typically are not assigned "RD" or "D" ratings but are instead rated in the "B" to "C" rating categories, depending on their recovery prospects and other relevant characteristics. Fitch believes that this approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

Plus (+) or minus (-) may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the "AAA" category or to categories below "CCC".

"NR" – Denotes that Fitch does not publicly rate the associated issue or issuer.

"WD" – Indicates that the rating has been withdrawn and is no longer maintained by Fitch.

The ***DBRS*** long-term rating scale provides an opinion on the risk of default. That is, the risk that an issuer will fail to satisfy its financial obligations in accordance with the terms under which an obligation has been issued. Ratings are based on quantitative and qualitative considerations relevant to the issuer, and the relative ranking of claims. All rating categories other than "AAA" and "D" also contain subcategories "(high)" and "(low)". The absence of either a "(high)" or "(low)" designation indicates the rating is in the middle of the category. The following summarizes the ratings used by DBRS for long-term debt:

"AAA" – Long-term debt rated "AAA" is of the **highest credit quality. The capacity for the payment of financial obligations is exceptionally high and unlikely to be adversely affected by future events.**

"AA" – Long-term debt rated "AA" is of **superior credit quality. The capacity for the payment of financial obligations is considered high. Credit quality differs from "AAA" only to a small degree. Unlikely to be significantly vulnerable to future events.**

"A" – Long-term debt rated "A" is of good **credit quality.** The capacity for the payment of financial obligations is substantial, but of lesser credit quality than "AA." May be vulnerable to future events, but qualifying negative factors are considered manageable.

"BBB" – Long-term debt rated "BBB" is of **adequate credit quality. The capacity for the payment of financial obligations is considered acceptable. May be vulnerable to future events.**

"BB" – Long-term debt rated "BB" is of **speculative, non-investment grade credit quality. The capacity for the payment of financial obligations is uncertain. Vulnerable to future events.**

"B" – Long-term debt rated "B" is of **highly speculative credit quality. There is a high level of uncertainty as to the capacity to meet financial obligations.**

"CCC", "CC" and "C" – Long-term debt rated in any of these categories is of **very highly speculative credit quality. I**n danger of defaulting on financial obligations. There is little difference between these three categories, although "CC" and "C" ratings are normally applied to obligations that are seen as highly likely to default, or subordinated to obligations rated in the "CCC" to "B" range. Obligations in respect of which default has not technically taken place but is considered inevitable may be rated in the "C" category.

"D" – A security rated "D" is assigned when the issuer has filed under any applicable bankruptcy, insolvency or winding up statute or there is a failure to satisfy an obligation after the exhaustion of grace periods, a downgrade to "D" may occur. DBRS may also use "SD" (Selective Default) in cases where only some securities are impacted, such as the case of a "distressed exchange".

Municipal Note Ratings

An ***S&P Global Ratings*** U.S. municipal note rating reflects S&P Global Ratings' opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings' analysis will review the following considerations:

- Amortization schedule - the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment - the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

"SP-1" – A municipal note rated "SP-1" exhibits a strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

"SP-2" – A municipal note rated "SP-2" exhibits a satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

"SP-3" – A municipal note rated "SP-3" exhibits a speculative capacity to pay principal and interest.

Moody's uses the Municipal Investment Grade ("MIG") scale to rate U.S. municipal bond anticipation notes of up to three years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels – "MIG-1" through "MIG-3" – while speculative grade short-term obligations are designated "SG". The following summarizes the ratings used by Moody's for these short-term obligations:

"MIG 1" – This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

"MIG 2" – This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

"MIG 3" – This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

"SG" – This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

For variable rate demand obligations ("VRDOs"), Moody's assigns both a long-term rating and a short-term payment obligation rating. The long-term rating addresses the issuer's ability to meet scheduled principal and interest payments. The short-term payment obligation rating addresses the ability of the issuer or the liquidity provider to meet any purchase price payment obligation resulting from optional tenders ("on demand") and/or mandatory tenders of the VRDO. The short-term payment obligation rating uses the VMIG scale. Transitions of Variable Municipal Investment Grade ("VMIG") ratings.

With conditional liquidity support differ from transitions of Prime ratings reflecting the risk that external liquidity support will terminate if the issuer's long-term rating drops below investment grade. For VRDOs, Moody's typically assigns a VMIG rating if the frequency of the payment obligation is less than every three years.

If the frequency of the payment obligation is less than three years but the obligation is payable only with remarketing proceeds, the VMIG short-term rating is not assigned and it is "NR". Industrial development bonds in the United States where the obligor is a corporate may carry a VMIG rating that reflects Moody's view of the relative likelihood of default and loss. In these cases, liquidity assessment is based on the liquidity of the corporate obligor.

"VMIG 1" – This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections.

"VMIG 2" – This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections.

"VMIG 3" – This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections.

"SG" – This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack structural or legal protections.

"NR" – Is assigned to an unrated obligation.

Fitch uses the same ratings for municipal securities as described above for other short-term credit ratings.

About Credit Ratings

An ***S&P Global Ratings*** issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings' view of the obligor's capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Moody's credit ratings must be construed solely as statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities. Ratings assigned on ***Moody's*** global long-term and short-

term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities.

Fitch's credit ratings relating to issuers are an opinion on the relative ability of an entity to meet financial commitments, such as interest, preferred dividends, repayment of principal, insurance claims or counterparty obligations. Fitch credit ratings are used by investors as indications of the likelihood of receiving the money owed to them in accordance with the terms on which they invested. Fitch's credit ratings cover the global spectrum of corporate, sovereign financial, bank, insurance and public finance entities (including supranational and sub-national entities) and the securities or other obligations they issue, as well as structured finance securities backed by receivables or other financial assets.

Credit ratings provided by ***DBRS*** are forward-looking opinions about credit risk which reflect the creditworthiness of an issuer, rated entity, and/or security. Credit ratings are not statements of fact. While historical statistics and performance can be important considerations, credit ratings are not based solely on such; they include subjective considerations and involve expectations for future performance that cannot be guaranteed. To the extent that future events and economic conditions do not match expectations, credit ratings assigned to issuers and/or securities can change. Credit ratings are also based on approved and applicable methodologies, models and criteria ("Methodologies"), which are periodically updated and when material changes are deemed necessary, this may also lead to rating changes.

Credit ratings typically provide an opinion on the risk that investors may not be repaid in accordance with the terms under which the obligation was issued. In some cases, credit ratings may also include consideration for the relative ranking of claims and recovery, should default occur. Credit ratings are meant to provide opinions on relative measures of risk and are not based on expectations of any specific default probability, nor are they meant to predict such.

The data and information on which DBRS bases its opinions is not audited or verified by DBRS, although DBRS conducts a reasonableness review of information received and relied upon in accordance with its Methodologies and policies.

DBRS uses rating symbols as a concise method of expressing its opinion to the market but there are a limited number of rating categories for the possible slight risk differentials that exist across the rating spectrum and DBRS does not assert that credit ratings in the same category are of "exactly" the same quality.
